Sioen at a glance

Sioen Industries is a diversified group with an extensive portfolio of products and activities. We **produce** high performance yarns, fibres, fabrics, garments and colouring solutions. By tailored engineering and innovation, our products perform **better**, endure **more** and last **longer**. They serve our purpose: to **protect** people, property and planet.

Our products

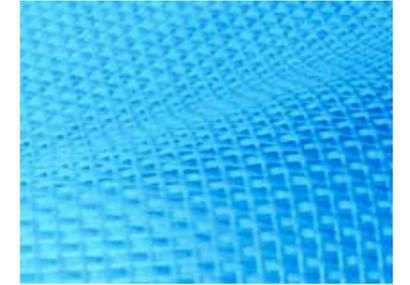

Yarns & Fibres

We're leading European yarn and fibre producer that boasts technicity and proximity. Applications: geotextiles, coated technical textiles, ropes, hoses, safety belts, sailcloth, conveyor belts, ...

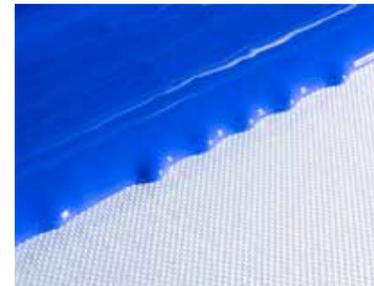

Woven fabrics

Quality weaver of high-tech fabrics with own and sourced yarns. Application: Sailcloth, aquaculture, airbag, teabag, filters, conveyor belts, ...

Scrim

High-performance scrim for reinforcement and protection. Applications: Sun shading, cladding, reinforcement in construction, geogrids, wind shields, airbag hinges, ...

Coated technical textiles

Engineered technology of 7 different coating techniques. Applications: Fabrics for side curtains, rolling doors, tents, sun shading, mattress covers, biogas installations, protective clothing, bags, backpacks, ...

Films and sheets

Films and sheets for sun visors, trunk carpets, luggage covers, wall covering, pond liners, body bags, packaging, ...

Nonwovens

Vertical integrated product offering of geotextiles and felts. Applications: Geotextiles, mattresses, car breaks, acoustic panels, trunk covers, sewer liners, wind mills, ...

Professional protective clothing

Lifesaving professional protective clothing for any working condition, protecting against any threat: all weather conditions: workwear, floatation suits, lifejackets, drysuits, body armours, fire fighters clothing, chainsaw protection, ...

Keders and cutting & complexing services

Slitting, cutting, lamination & welding with state-of-the art technology. Keders, laser and knife cutting for automotive, pond liners, safety and security, ...

Pigment pastes & varnishes

Tailored colouring solutions for flooring, wall covering, technical sheeting, seeds, foam, paints, coatings, sealants, adhesives, ...

Michèle Sioen - CEO

Passioen, a contraction of Sioen and passion that defines us

As a family business with **family values**, we see Environmental, Social and Governmental subjects, also known as Corporate Social Responsibility, as an integral and fundamental part of our company's DNA and corporate culture. For us, it is all about engaging with all our stakeholders for a better future and not just about short-term gains. It is the way we conduct our daily business, our impact on society, and our role in creating wealthy, healthy and sustainable communities.

It is seamlessly integrated into our overall strategy and vision of **'Protection through innovation'** and **'Shaping the future of Technical Textiles.'**

It is translated into our company **Passioen**, the passion we hope you can feel when you are interacting with us: in our products, our level of quality, protection, and service, in our people.

Feel the Passioen

Products, Processes, Sustainable Focus

Our **products make a positive societal impact** and are used to make people's lives better. New fabric solutions to reduce weight in transportation, fabrics and garments that enable the production of renewable energy, and biodegradable fabrics are just some examples.

We are **minimising the life cycle impact of our products**. We consider the entire environmental performance of our products through life cycle assessment. We are identifying and choosing lower impact raw materials and we use recyclables where possible. Increasing longevity is a top priority.

Climate change and carbon reduction is at the top of Sioen's and the European Union's agendas. We continuously look into possibilities and invest in solutions to reduce our energy use, and consequently, reduce our carbon emissions. For example, the energy that is generated in production is captured and used for preheating the ovens, which drastically reduces gas consumption. We are also generating renewable energy with solar panels on all our production sites.

We are innovating to reach the same product properties with **less materials**. We strive for **smart waste management**, starting with the prevention of waste and the monitoring of all flows, using the 5 Rs of waste management: Refuse, Reduce, Reuse, Repurpose and Recycle.

Join the Passioen People

I have said this many times before: People are our real capital. Our "Passioened" people make sure our promises are kept and they always work in the spirit of 'everything is possible.' With a hands-on mentality, ensuring all together the success of the company. **At Sioen, we offer great working conditions in all our production plants.** We have a diverse set of employees regarding age, gender, and backgrounds, which we cherish.

Be the Passioen

Corporate Social Responsibility and by extension ESG-reporting is our priority! We are proud to show you our realisations, and we acknowledge that we can still improve in many fields.

Thank you for making this journey with us.

You are the Passioen

Michèle Sioen

CEO Sioen Industries Group

GENERAL

Passioen

Feel, join, be the Passioen.
You are the Passioen.

A contraction of the word “passion” and of the company “Sioen.” Passioen is the feeling of intense enthusiasm you sense at all Sioen collaborators, the joy when using our products, the excitement regarding our sustainability approach, our compelling desire to play a major part in everyone’s life.

the Passioen

You're better protected

Our yarns, fibres, technical textiles, garments, and colouring solutions are found in the industry, civil engineering, construction, agriculture and forestry, sports, and leisure, maritime, transportation, fire protection, security and automotive sectors. The short answer to where to find us is: anytime, anywhere. Look around and you will see Sioen, sometimes strikingly visible, sometimes hidden behind the scenes.

3 million garments each year

Our fabrics are used in European cars

Ink & varnish for all Belgian licence plates

worn by **300.000** professional firefighters

75% of all sidecurtains

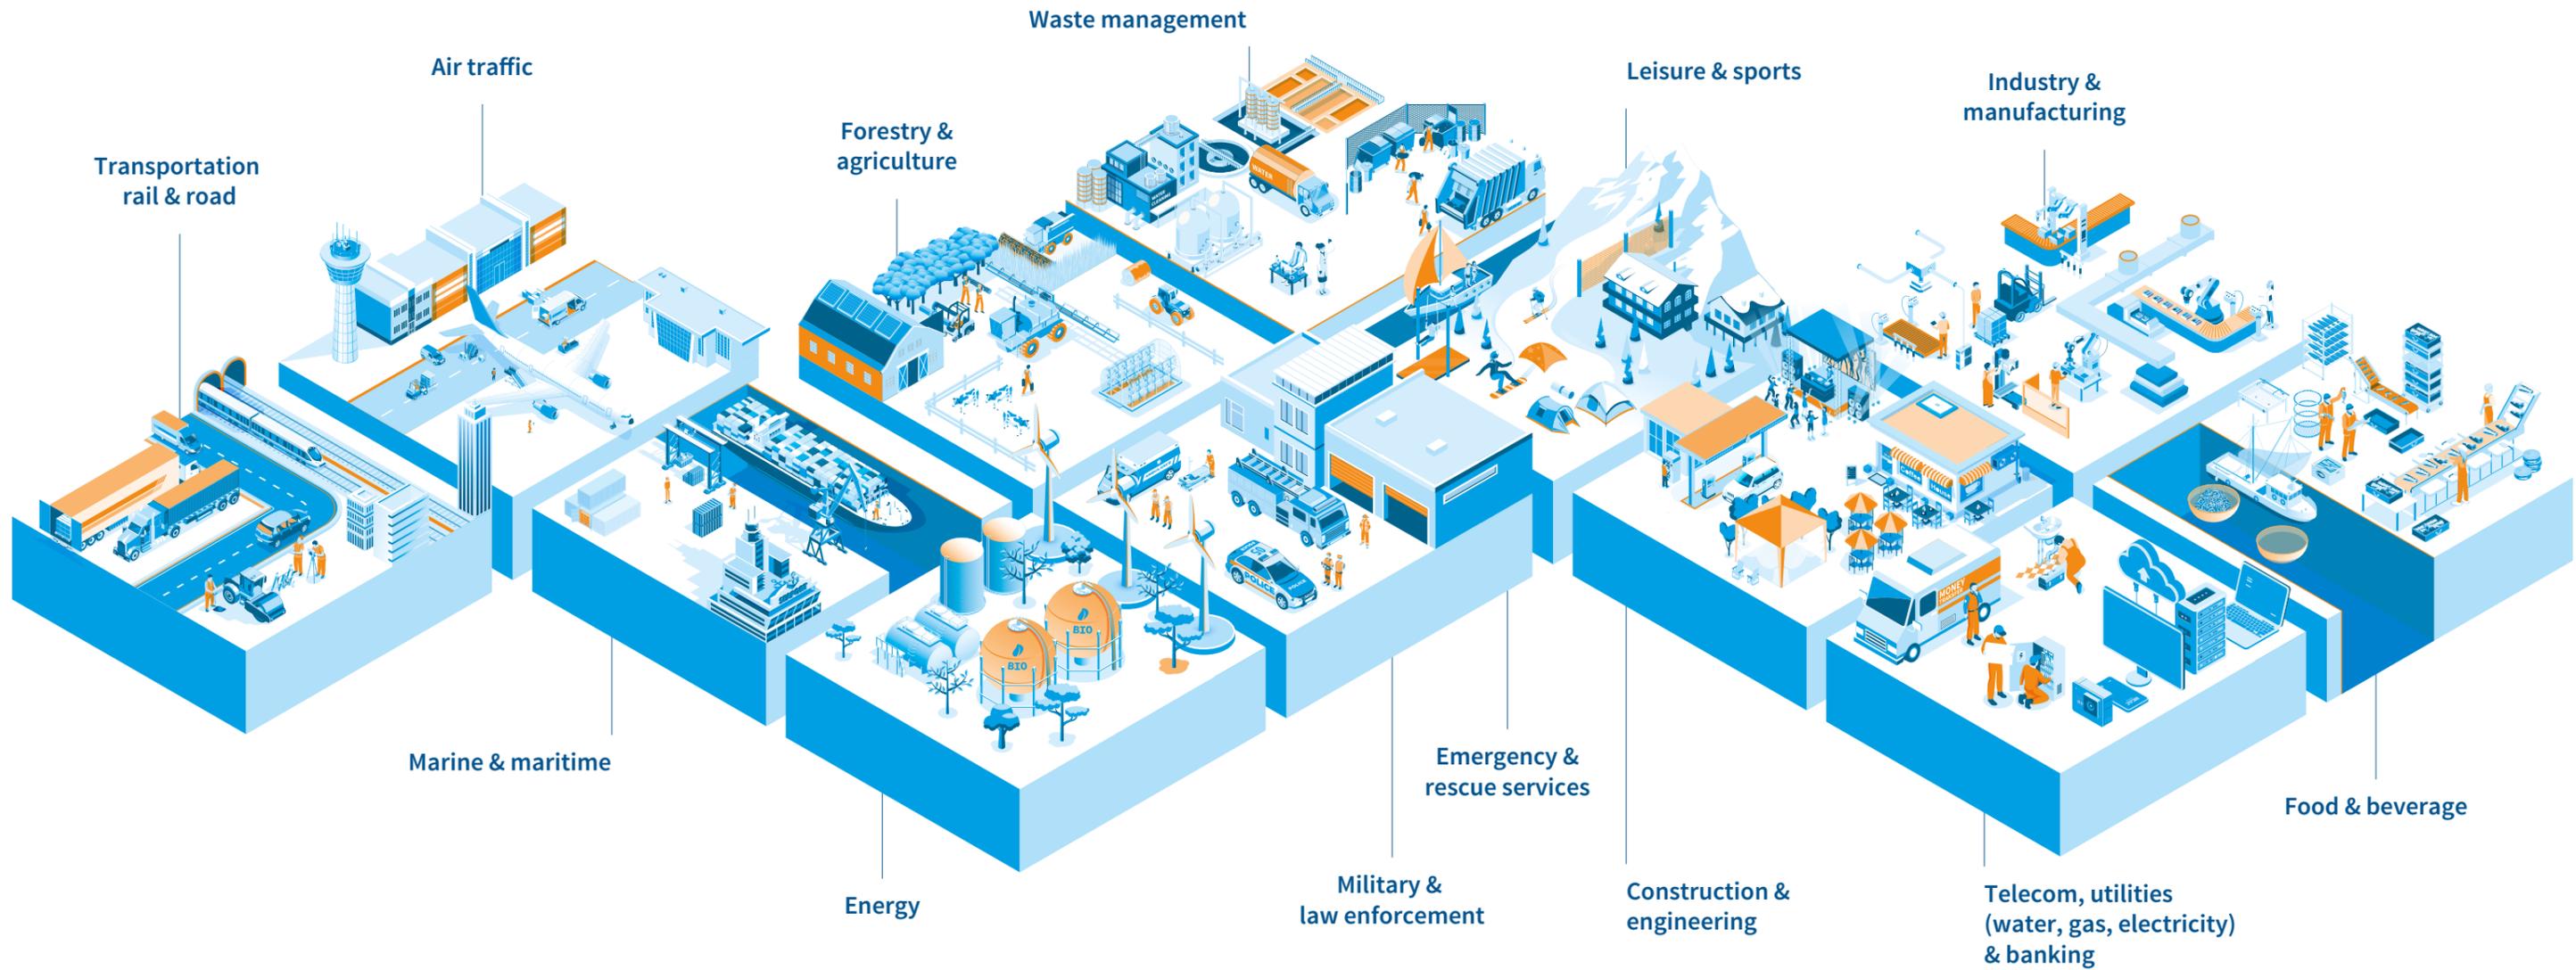

80% of all sails worldwide

The choice is yours

A single company can bring a sustainable change. Have you ever wondered what a group of companies could do? The Sioen Group exists of different companies and brands, each with their own products, yet all of them are committed to developing sustainable products, production processes and to keep on innovating sustainably.

Enjoy top quality

Passioen develops, produces, and distributes a wide variety of products within the world of technical textiles: yarns, fibres, colouring solutions, wovens and nonwovens, coated fabrics, and protective clothing. Technical superiority is what binds us. With continuous investments in state-of-the-art machinery, innovation, and talent, we lift our products to new heights.

It is in our blood

Inspired by the weaving activities of his father, Jean-Jacques Sioen started a business in technical textiles in 1960. Over the following decades, he and his wife Jacqueline Sioen crafted a remarkable success story. Sioen gradually grew into a highly diversified industrial group with activities in all corners of the world. Today, their daughters Michèle, Pascale, and Danielle Sioen are the driving force.

Set on sustainability

We are aware of our social, environmental, and economic responsibilities in society. Therefore, ESG is an integral part of our company strategy. This report gives an overview of who we are, what our approach is towards Corporate Social Responsibility (CSR)/ Environment, Social & Governance (ESG), and provides several example actions. This list, however, is inexhaustive.

Leadership & Governance

Business on a mission

Since our very existence, protection and innovation have been part of our companies' vision, mission, and strategy. This includes creating employment, generating innovation, paying taxes, creating wealth, empowering local communities, and any other economic impact. Although we are a large company, we are imbued with our family values, led by example by family.

Our purpose

Protection through innovation

Our mission

Be the world market leader in technical textiles and protective clothing, protecting people and their belongings.

Our values

Passionate, integer and ethical, world citizens, accountable, respectful for people and environment, entrepreneurial and innovative, creating value

Our vision

To shape the future of technical textiles.

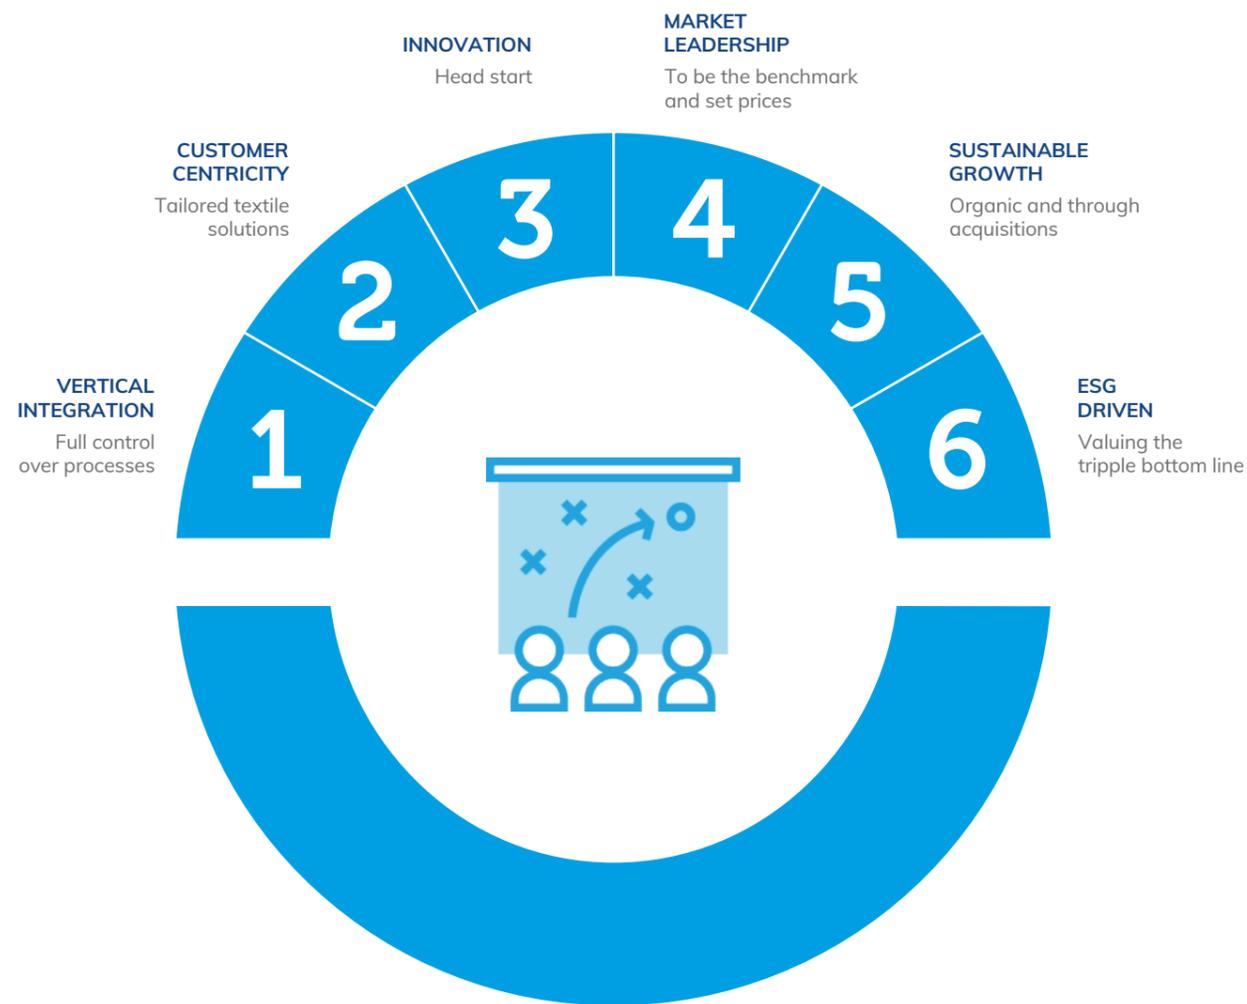

sioen.com
Please consult our website for a full overview that is regularly updated.

This is our strategy

Our corporate strategy is based on 6 solid pillars that help us fulfill our purpose 'Protection through Innovation'. Our strategy is our guiding compass when managing resources, risk and return. It helps us realise our goals of being market leader in selected sectors of the technical textiles, colouring solutions and professional clothing.

We walk the talk

We walk the talk and that's reflected in memberships, certificates and awards. They are the best way to prove to our stakeholders that we do what we say we do. We're very proud on the fact that we were one of the first companies in our sector to implement the STeP and the ISO 14001 certification.

csr.sioen.com
QR code: Discover our certificates, memberships and awards on our CSR website

Our STeP Results

	Level 02	Level 03
Chemical mangagement		95%
Environmental performance		79%
Environmental management		86%
Social responsibility		95%
Quality management		83%
Safety		92%

We are the first PPE producer to obtain the ISO 14001 certificate

This norm sets out the criteria for an Environmental Management System (EMS). It does not state requirements for environmental performance, but maps out a framework that companies can follow to set up an effective EMS. Using ISO 14001 can provide assurance to company management and employees as well as external stakeholders that environmental impact is being measured and improved.

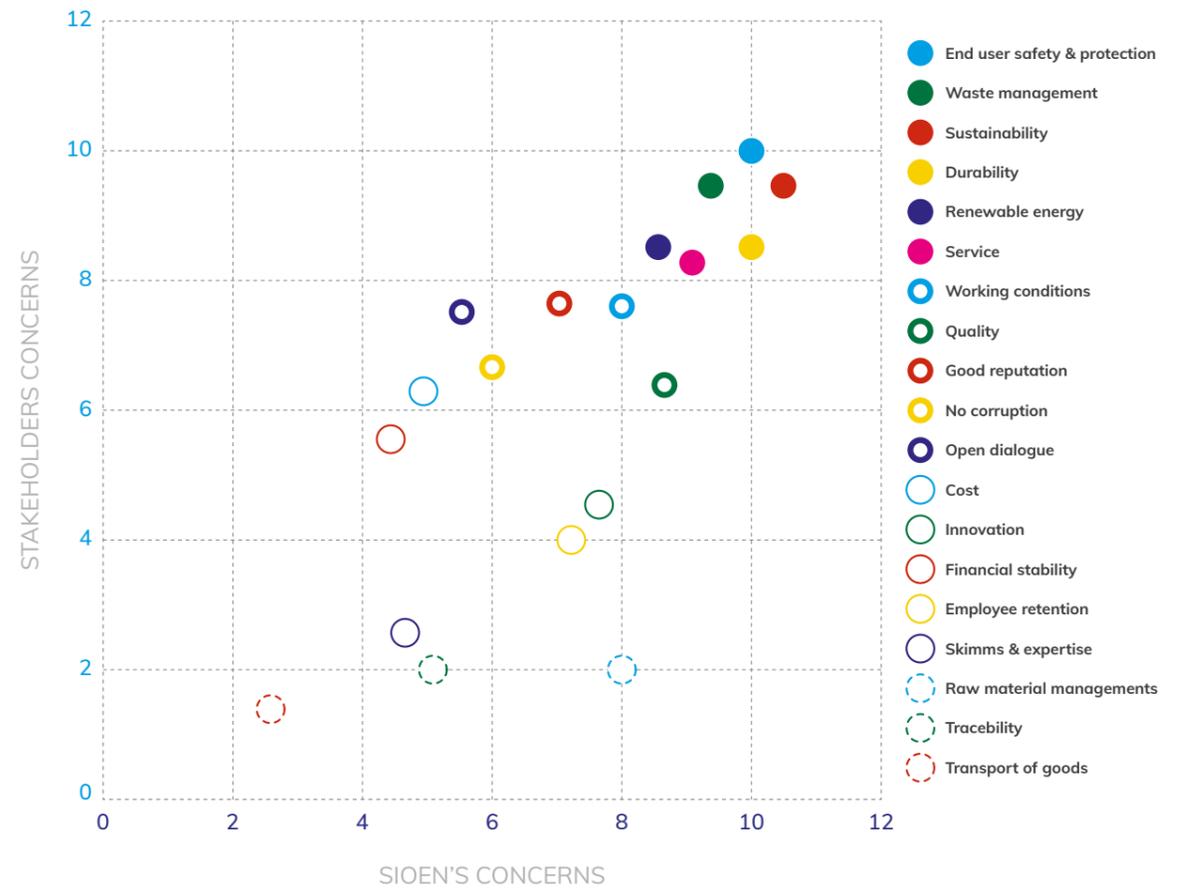

You're our Passioen

You cannot bring change on your own. Only by working together with other organisations and, of course, by considering the values, concerns, and expectations of our stakeholders, we can develop innovative products, and manufacture and produce them more sustainably. For and with you.

You: stakeholder, employee, worker, banker, owner, university professor, politician, client, supplier, adult, retiree, youngster, parent, child, student, athlete, reader, writer, poet, artist, craft person, world citizen, urbanite, farmer, forester, traveling nomad, neighbour, friend, lover, family, world.

Subjects

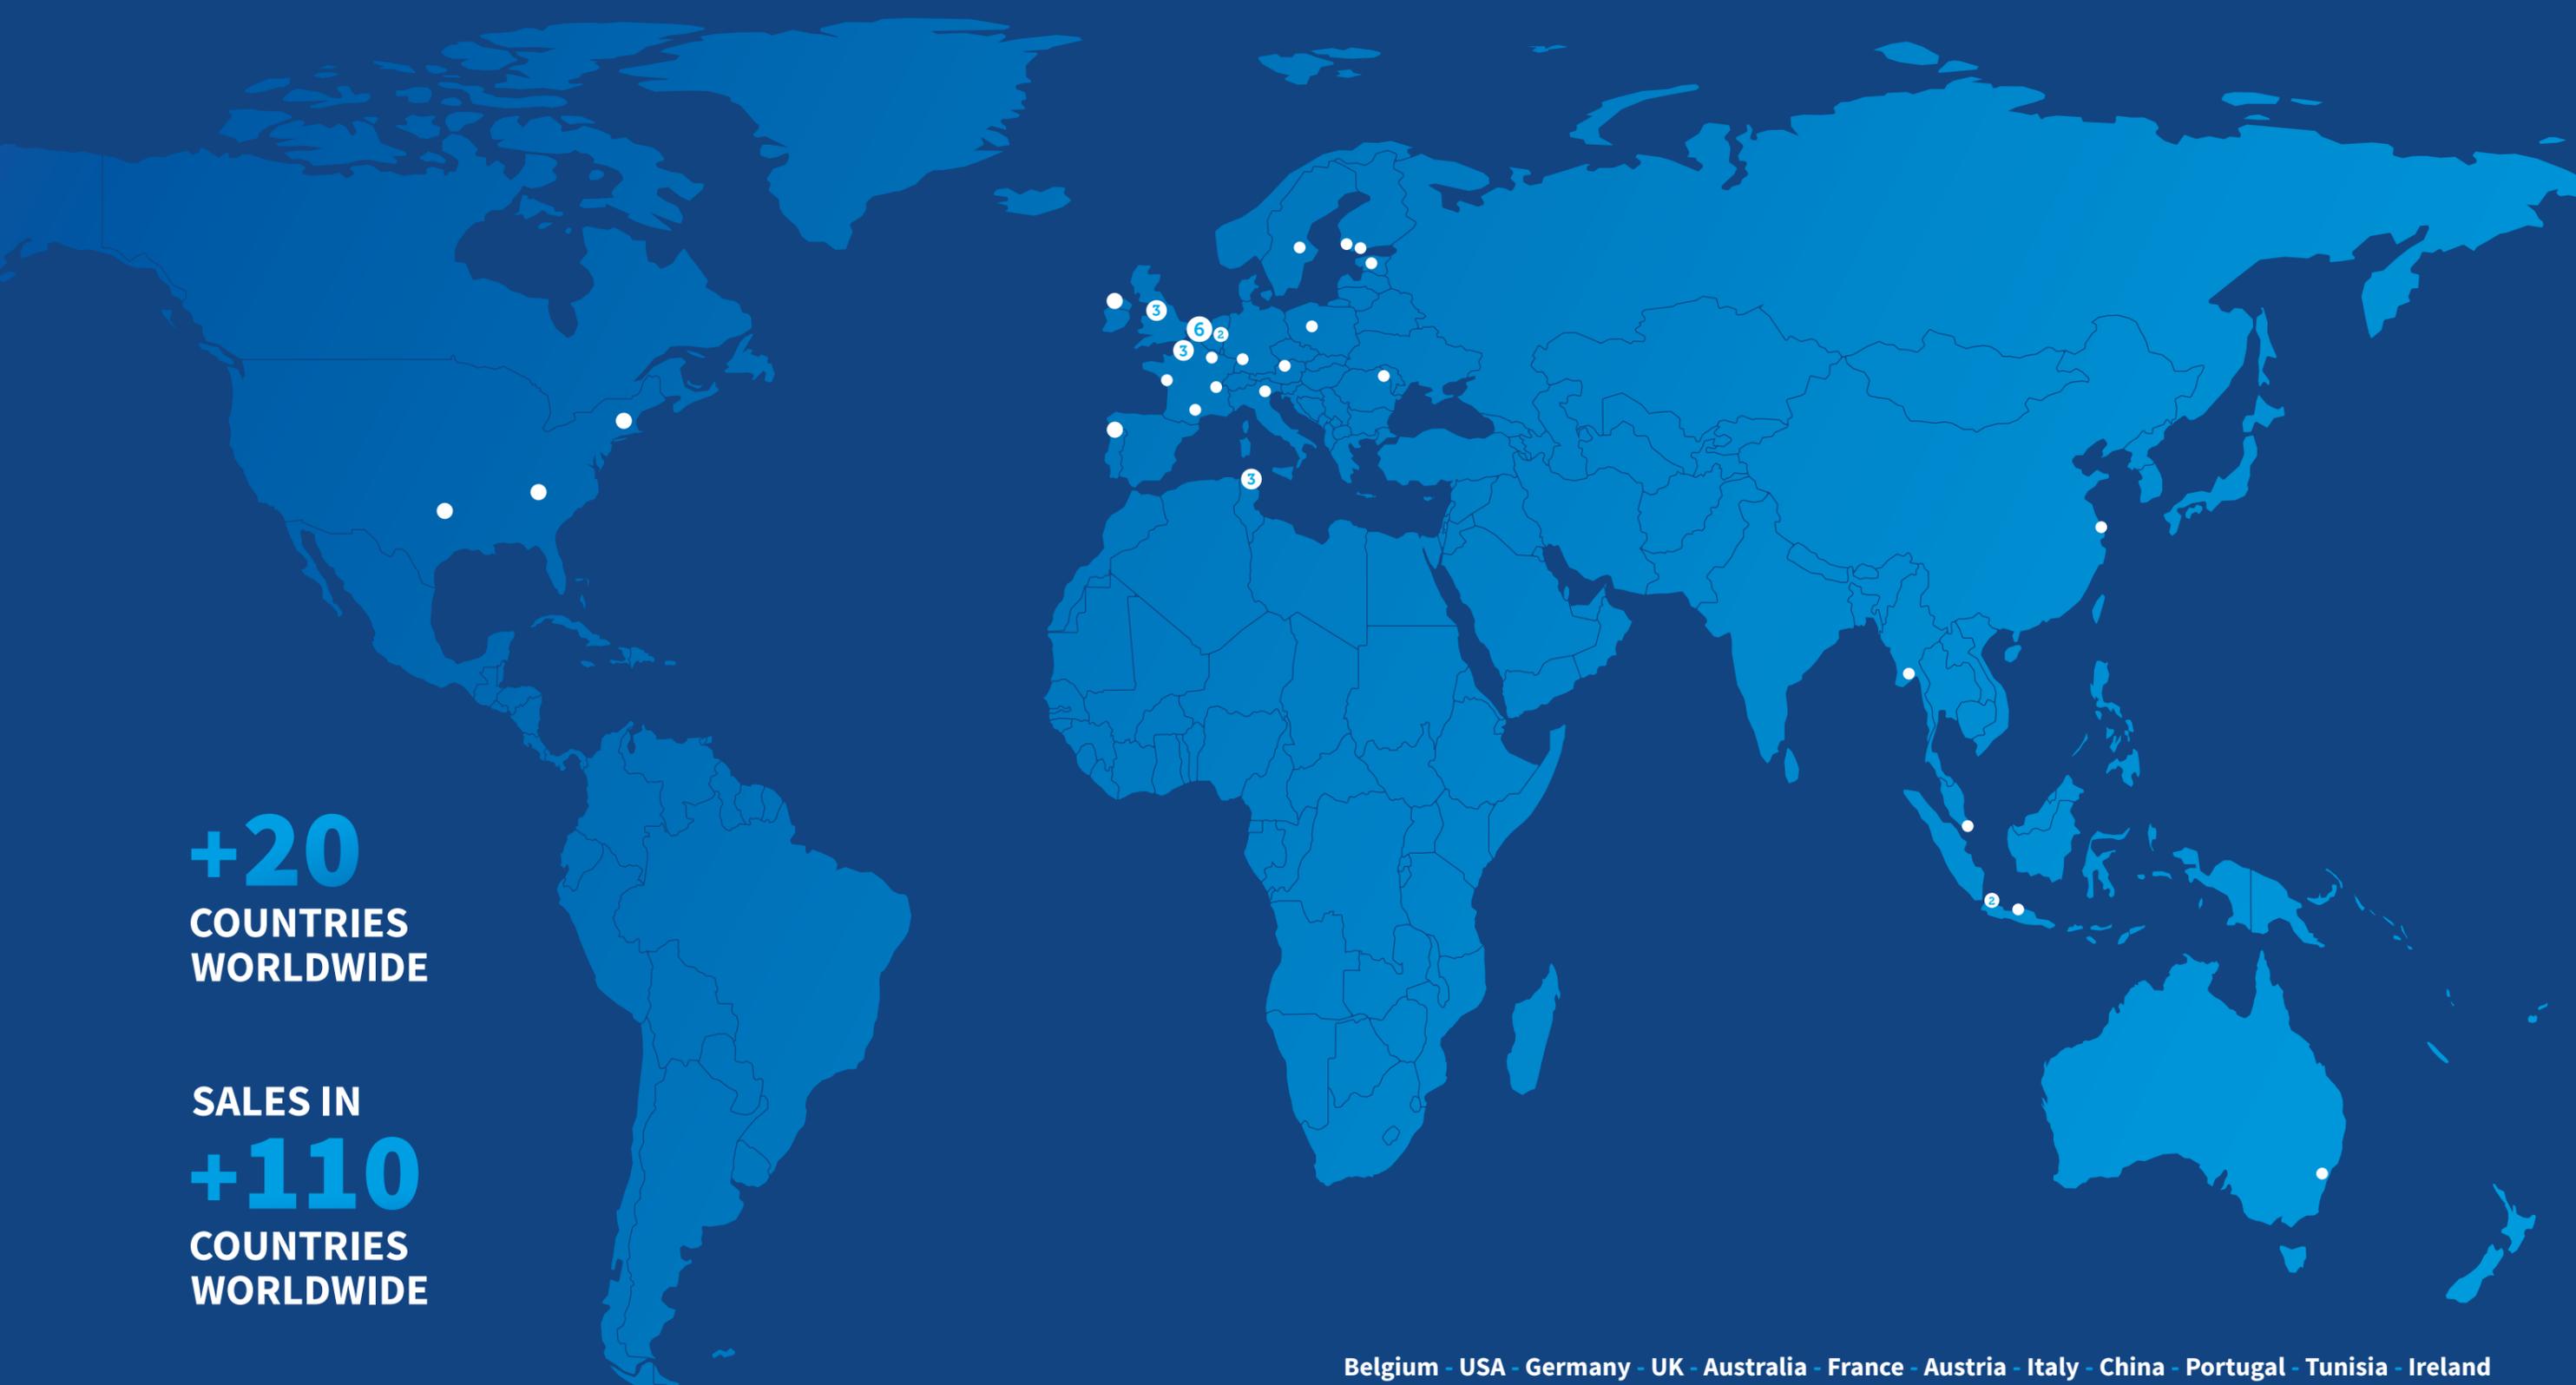

You know we care

We want to be a second home for all talents. Differences are embraced and we promote our typical innovation culture. We regularly open our doors to young people and students, so that they too can experience an environment in which family values and economical ambitions go hand in hand. This includes an inclusive HR policy.

GENERAL

Passioen for sustainability

We do as we say and say what we do.

At Sioen, Corporate Social Responsibility - all the actions we set intended to have a positive influence on the world - is a source of innovation, competitive advantage, and value creation for all stakeholders. It is an integral part of our company strategy, and it is translated since decades in our company slogan "protection through innovation," making people's lives better.

What

We have chosen a reporting approach from different angles, organising all sustainability efforts in 5 main pillars:

Pillar 1
Environment
page 41

Pillar 2
Human capital
page 63

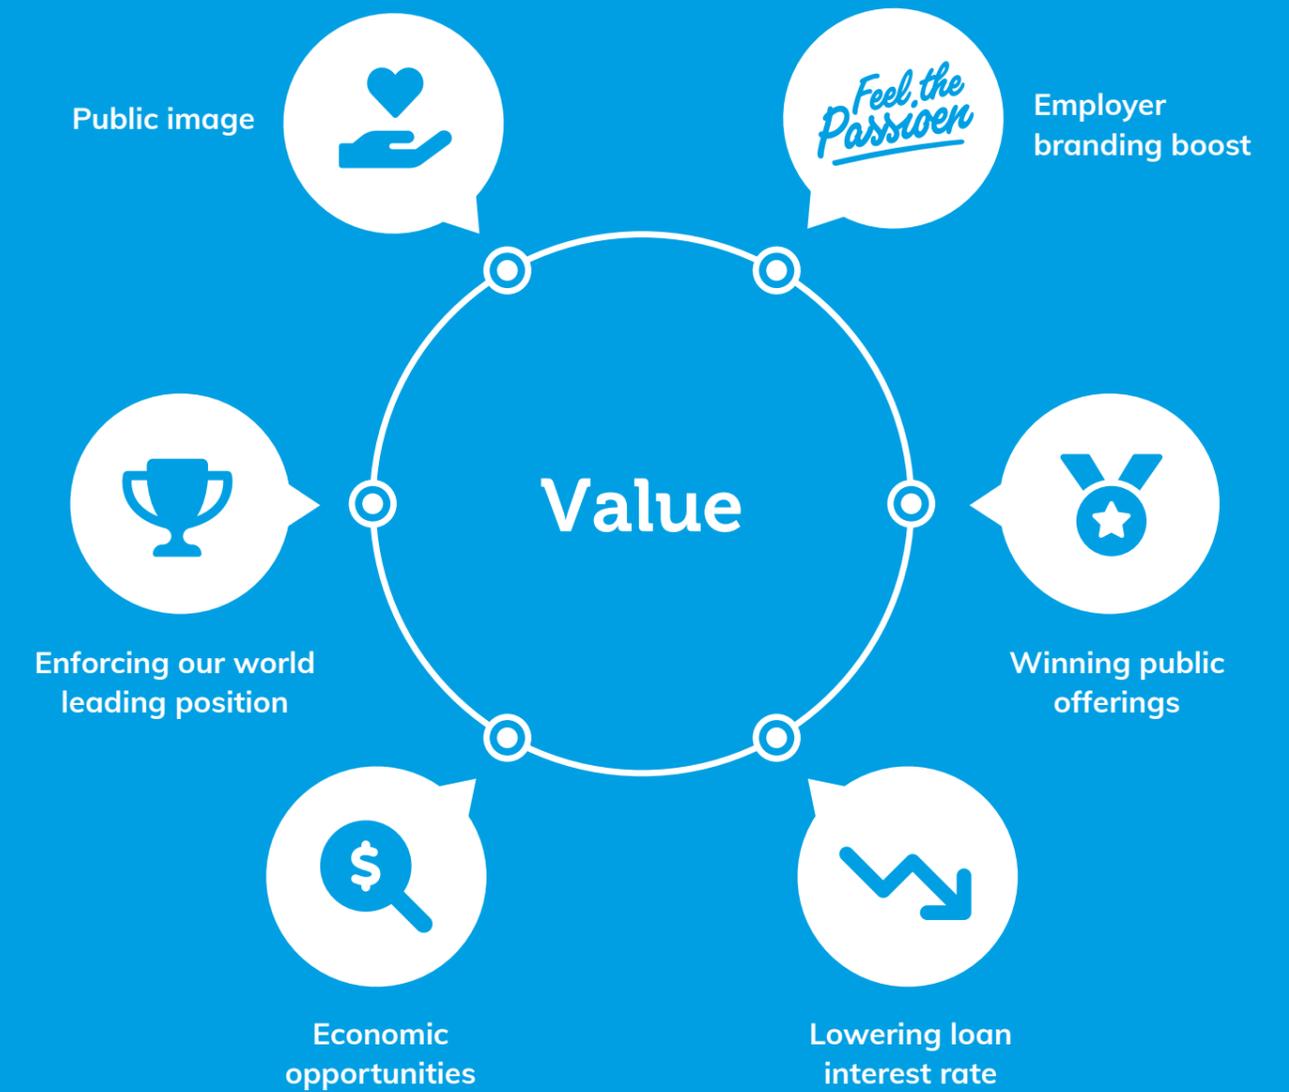

Pillar 3
Social capital
page 75

Pillar 4
Business and innovation
page 91

Pillar 5
Leadership and governance
page 97

Why

There is, of course, the bigger picture and the fact that we want to operate as good citizens, taking into consideration our stakeholders' requirements. However, in addition to the altruistic value, there are a myriad of benefits for us as a company. Reporting and, especially, acting upon sustainability reinforces our public image, boosts our retainment and recruitment, makes us also detect economic opportunities, helps us win more public offerings and potentially lowers our loan interest rate.

How

There are so many different reporting standards available today, that it is difficult to see the wood for the trees. We are basing our ESG report on 7 standards and guidelines. We are using the triple bottom line and the UN SDGs (Sustainable Development Goals) as a guidance in our operations, our decision-making, and priority setting. Our actions are translated into certificates, audits, memberships, as well as awards.

We're guided by

01

UN SDGs

UN Global Compact

standards board

Priorities

We strongly believe in the saying "Your focus determines your reality." We are changing all the time, from the way we use resources and manage waste, to the way we meet and travel. That is why we have chosen some challenges that get extra attention. We have set a sense of urgency to deal with this selected set of sustainability topics.

Sioen's sustainable new products

Product Life Cycle improvements

Energy and road to lower greengas emissions

Raw material efficiency

Equal and good working conditions

Pillar 1: Environment

*We do not inherit the earth from our ancestors.
We borrow it from our children.*

We want to measure and reduce the impact we have on our natural environment. This includes the use of natural resources, carbon footprint reduction, waste reduction, reforestation, extending the lifetime of our products and restoration of the natural harm done.

Ambitions

We want to get rid of the disposable society. We therefore try to extend the life cycle of as many materials and products as possible and help protect our planet from over-exploitation. By doing so we also reduce the Total Cost of Ownership (TCO) for our customers. This circular approach is closely related to our ambition to improve our own ecological impact.

Priorities

1. Energy – road to lower greenhouse gas emissions
 - a. Energy efficiency: a large-scale transition to lower our energy needs
 - b. Carbon footprint reduction
2. Waste & raw material efficiency - road to circular economy
 - a. Reducing or reusing our waste streams in production
 - b. Lowering our raw material needs for the same production output

SDGs

Energy – road to lower greenhouse gas emissions

We are set on reducing our carbon footprint. The yearly calculation of our CO₂ footprint makes it possible to closely follow our evolution regarding CO₂ emissions and performance and to define **actions to reduce them**. Identifying inefficiencies in terms of energy and raw material consumption positively affects the bottom line of our business, and of the world.

Energy efficiency: a large-scale transition

We are set on reducing energy in our production processes that produce the bigger part of our CO₂ emissions. We reduce our consumed energy need per square meter fabric or garment piece by continuously striving for improvement in first-time-right production, lowering process heat and increasing cooling temperature, lowering electricity usage with highly efficient motors, installing efficient compressors, etc. Additionally, we build energy-efficient new construction projects, insulate walls and roofs, install motion sensor switches in the offices and public areas. We have implemented energy efficiency methods for a systematic approach on the identification and realisation of energy efficiency improvement opportunities.

Recuperate energy more

We are set on recuperating energy throughout our value chain. Our production plants produce excess heat in high temperature ovens, incinerators and compressors that can be applied elsewhere. Applications vary from preheating coating ovens that drastically reduces our gas consumption to heating offices with compressor waste heat. We optimise our infrastructure and machinery to increase performance and efficiency.

Producing and facilitating renewable energy

We are set on generating renewable energy and supporting our clients with products to produce renewable energy. We have solar panels on our production sites and our products are increasingly applied in windmills and biogas installations. We do not exclude any renewable resources and examine the renewable energy of sunlight, wind, rain, tides, waves, and geothermal heat, among others.

csr.sioen.com
QR code: Read more about energy related actions on our CSR website

Selected actions

Sioen garments produced in Europe are climate neutral

Sioen apparel rolls out an energy improvement program that eventually will lead to complete carbon neutrality.

Insulation of cooling water and thermal oil pipes

Insulation of both cooling water pipes and thermal oil pipes, results in a substantial energy saving.

Reduced process heat needs in textile washing department of sailcloth

Dimension-Polyant, part of the Sioen Group, is compliant with the ISO 50001 standards.

Compressed air leakage reduction plan

Reducing the volume of air leaks to 10-15% thus reducing the energy consumption of the compressors.

Solar panels on production plants

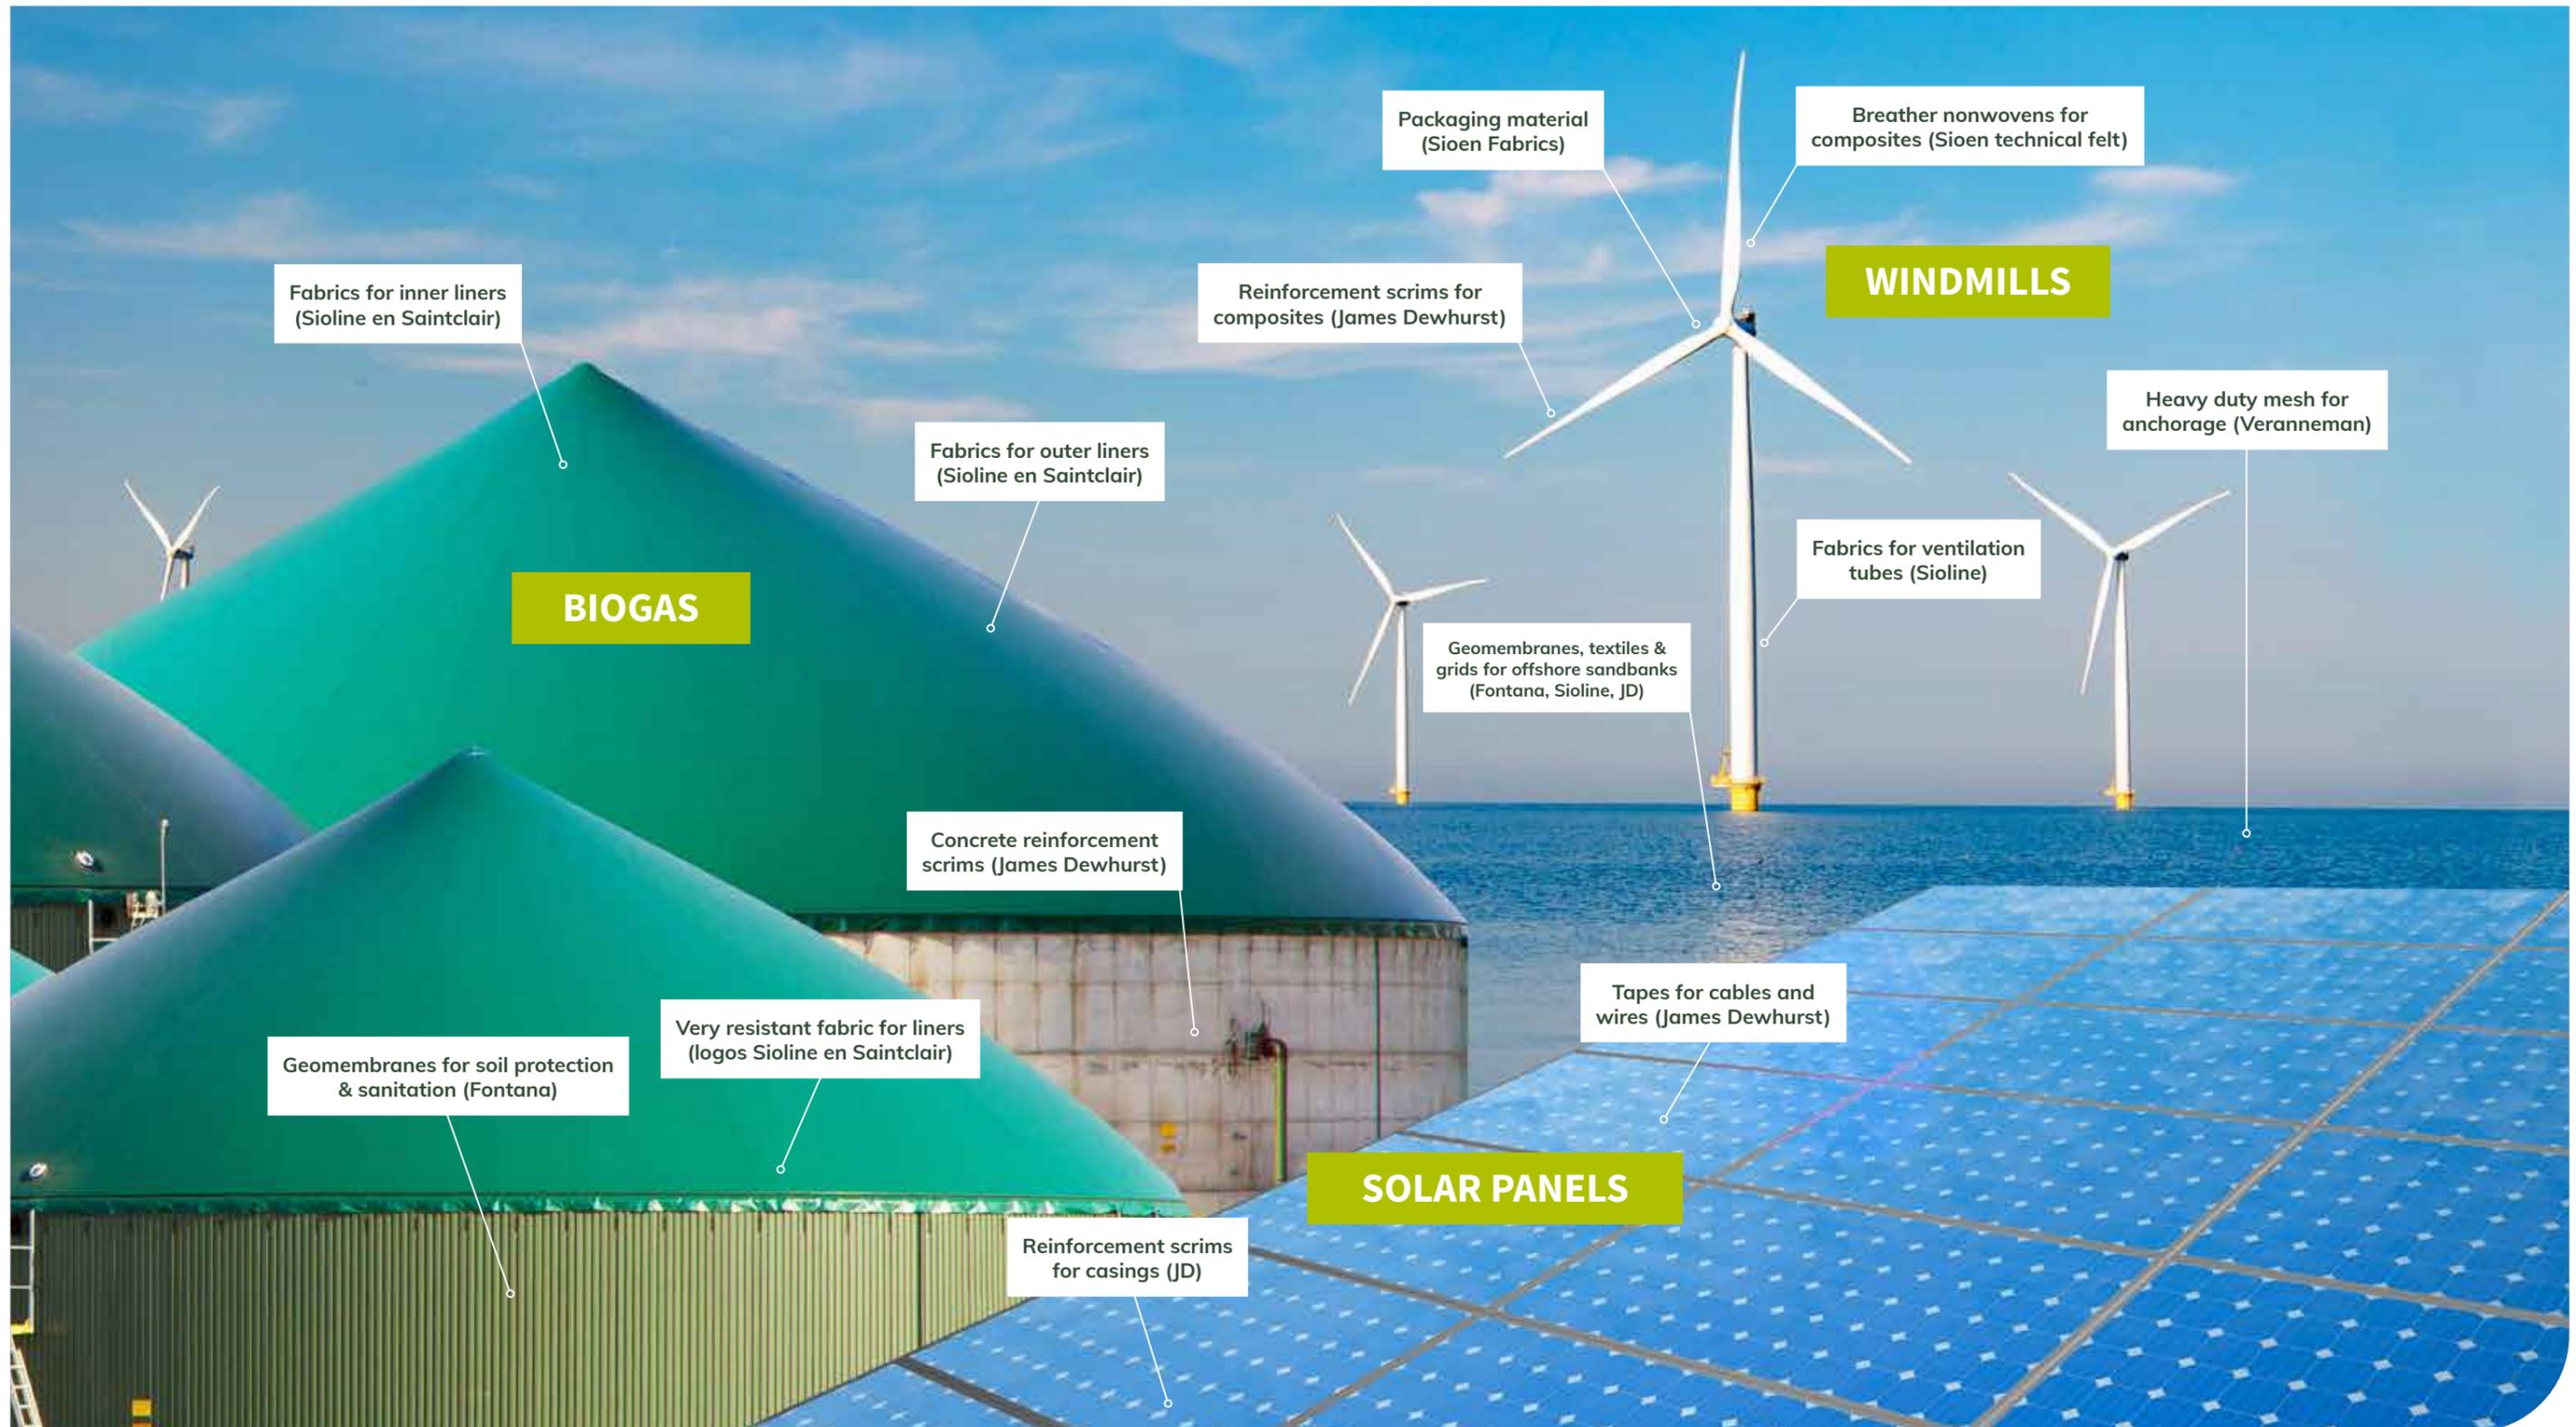

At our headquarters in Ardoorie for example, 10% of the total annual electricity consumption comes from the solar panels on the roof.

Loading docks for electric cars

Our Sioen Talents and our neighbours can charge their electric cars at one of our charging stations.

No green energy without Sioen textiles

Carbon footprint

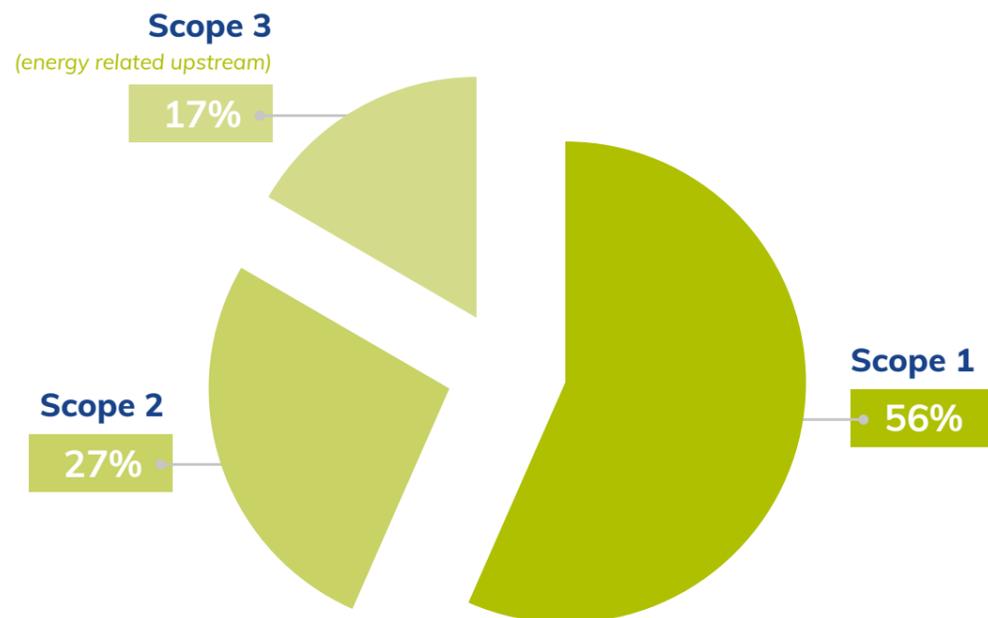

We are set on reducing our carbon footprint. The yearly calculation of our CO₂ footprint makes it possible to closely follow our evolution regarding CO₂ emissions and performance and to define actions to reduce those emissions. Identifying inefficiencies in terms of energy and raw material consumption positively affects the bottom line of our business, and of the world.

Overall conclusion for the carbon footprint 2021 of Sioen

Our total carbon footprint in 2021 was 54.585 tCO₂e (tonnes of CO₂ equivalents) for direct emissions (**scope 1** (excluding refrigerant gas emissions) & **scope 2**) and 10,894 tCO₂e for upstream emissions of fossil fuel and electricity losses (**scope 3** category 3).

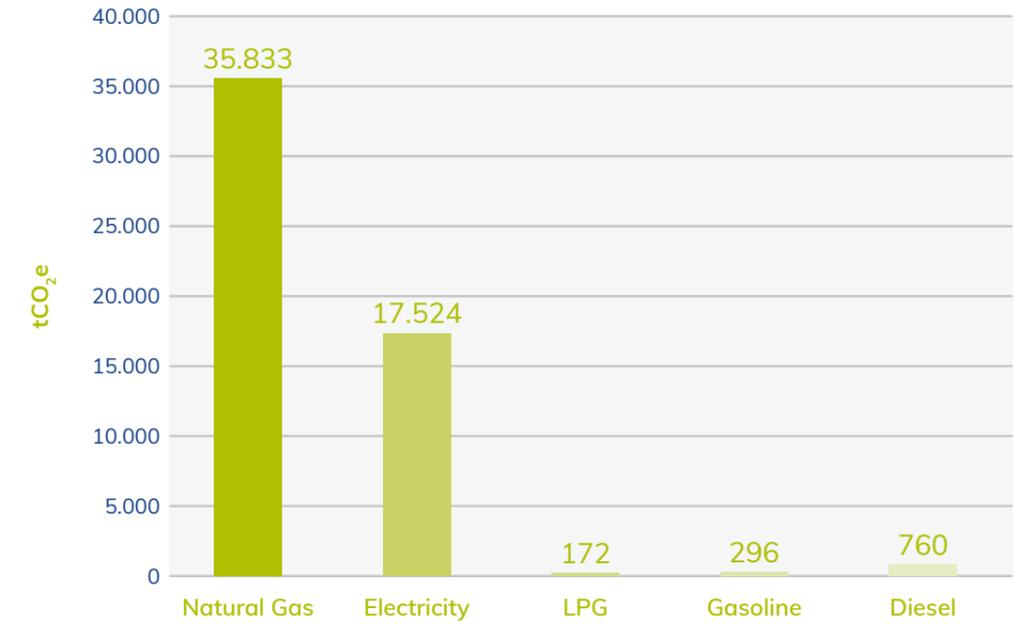

Share of emissions by scope (in %)

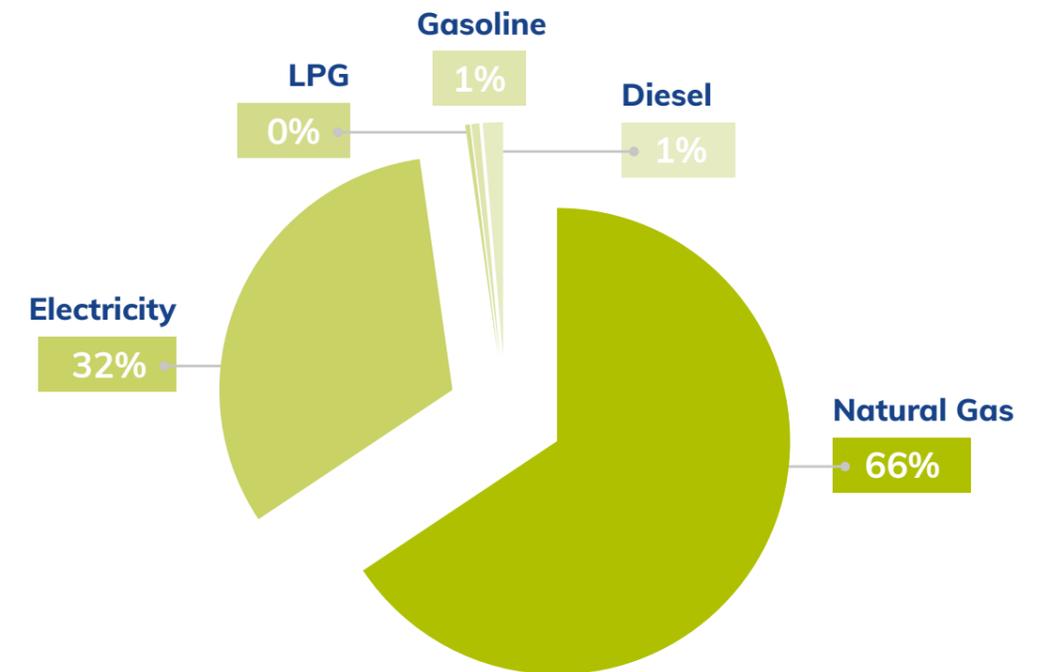

Natural gas is the largest emission source (66%; 35,833 tCO₂e) followed by electricity consumption (32%; 17,524 tCO₂e). Emissions related to mobility (fuel for commercial vehicles and forklifts) are limited to 2%.

Share of emissions by scope (in %)

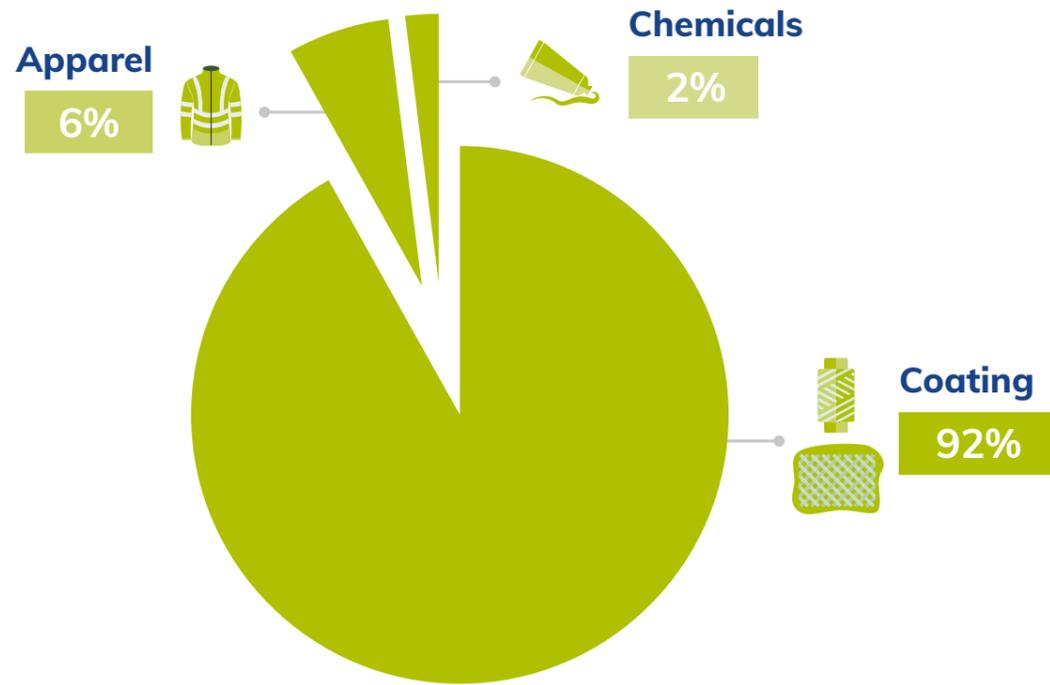

Share of emissions, by emission category (in %)

The Coating division, where we produce yarns, fibres and all kinds of textiles, represents the majority of our emissions (92% of direct emissions) and 63.5% of the group's turnover.

Share of Sioen emissions by division

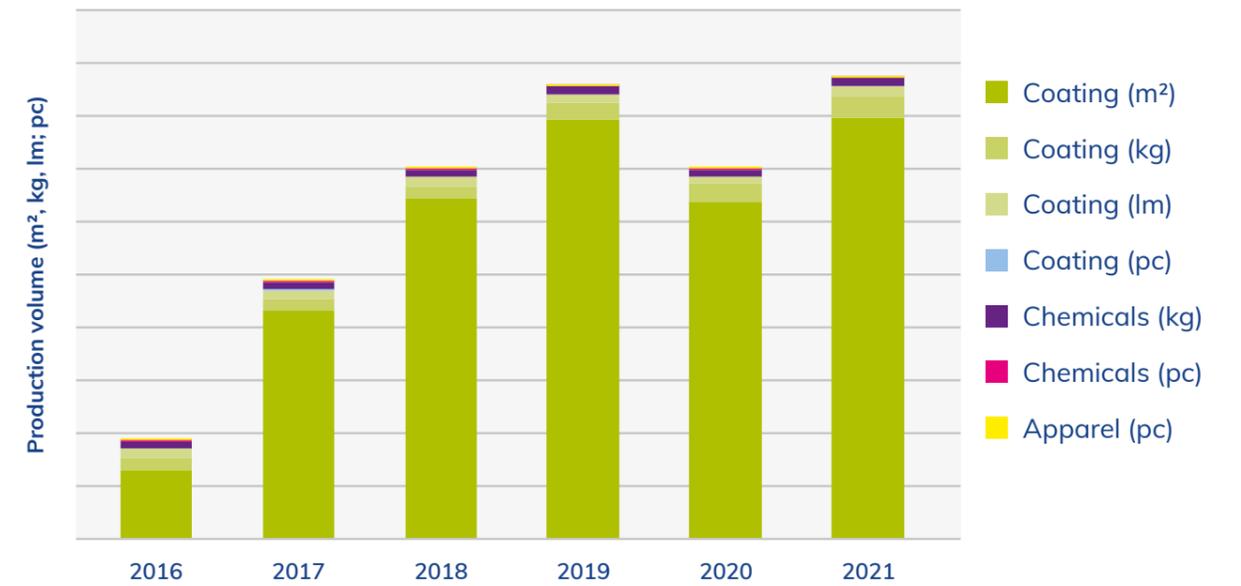

Multi-year comparison for Sioen (2016 – 2021)

General

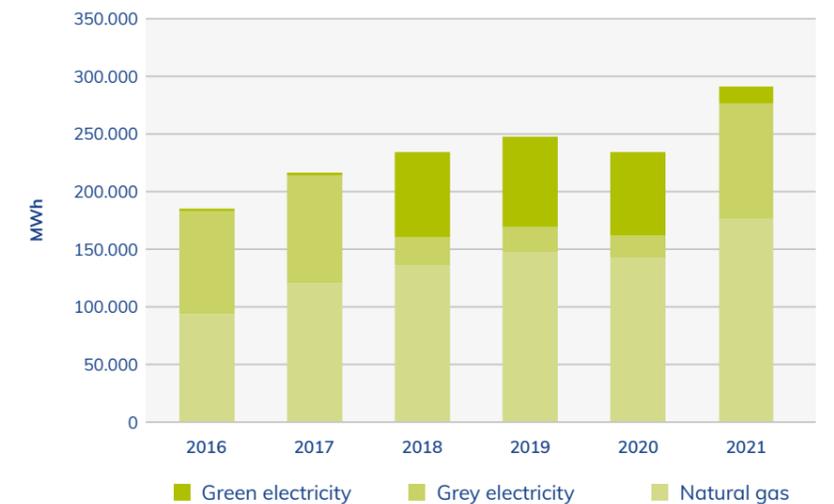

The graph shows the production quantities per division and production unit. This clearly shows that we're a growth company. We've quadrupled our volumes since 2016. After a dip in the year 2020, caused by the COVID-19 pandemic, production recovered in 2021 and increased by approximately 25%.

Production quantities (in %)

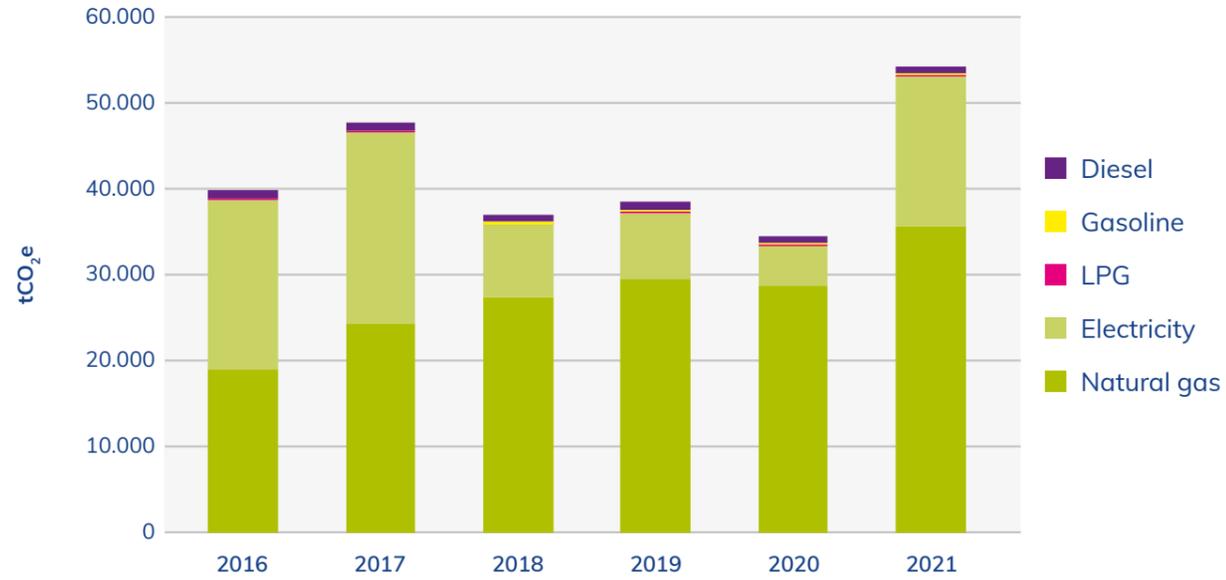

This graph shows the absolute energy consumption over the years. Less energy was needed in 2020 due to a decrease in production during the COVID-19 pandemic. As volumes recovered in 2021, so did the energy consumption. The total energy consumption for production in 2021 is approximately 25% higher than in 2020, which follows the trend of the extra volume produced.

Evolution of energy consumption related to production

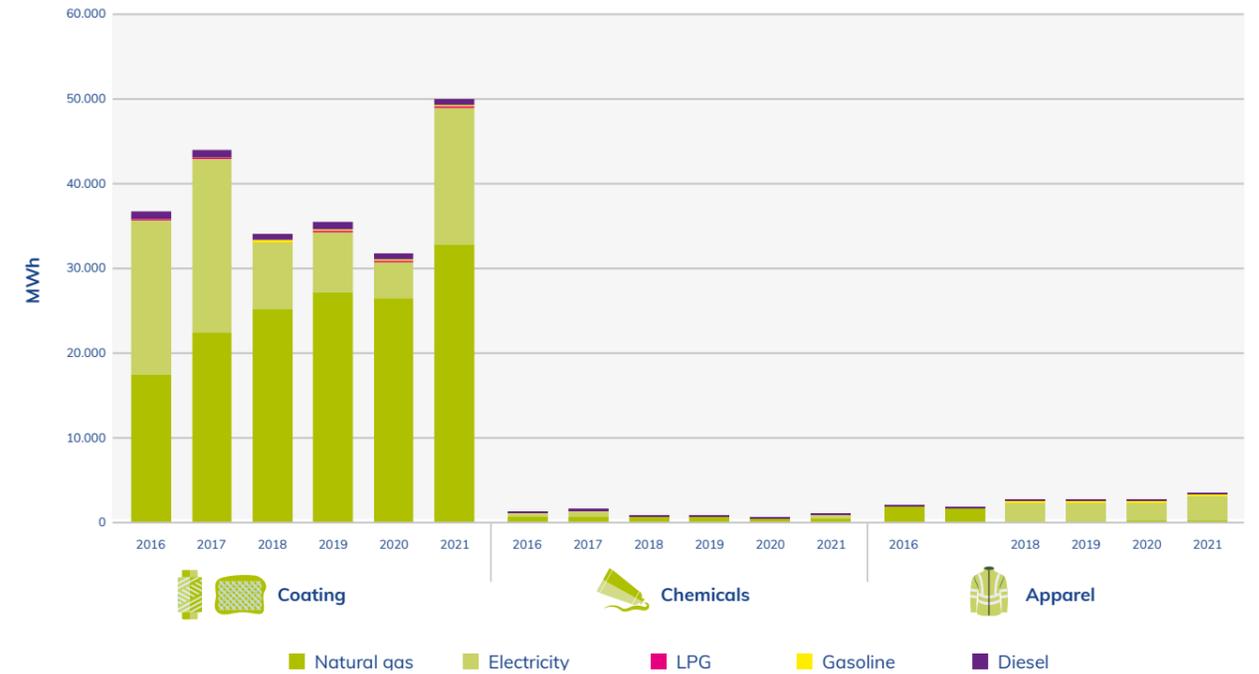

As a direct consequence of increased production, total direct emissions in 2021 are 57% higher compared to emissions in 2020. This increase is particularly visible in the largest categories 'Natural gas' (+24%) and 'Electricity' (+269%). For the smaller categories, an increase is only visible in the category 'Gasoline' (+39%). 'Diesel' (-2%) and 'LPG' (-14%) have both decreased compared to 2020.

Sioen direct CO₂ emissions 2016-2021, per emission category

Detailed direct emission categories evolution by Sioen division (tCO₂)

Because of the constant pressure on price and availability of both raw materials and energy, we decided to source grey electricity in our Belgian plants, starting 2021. This impacted our footprint substantially because some of the major consumers of electricity such as the spinning mill and weaving plants are located in Belgium.

When we look at the emissions per division, we see an increase in all divisions compared to 2020. In the Coating division, this increase is the most pronounced because producing yarns, fabrics and coated textiles requires a lot of energy (both gas and electricity). In the Chemicals (where we produce colouring solutions) and Apparel divisions (where we manufacture protective garments), the absolute increase is less pronounced as less energy is required in those production plants compared to coating production.

There are a number of factors that underlie the increase in emissions:

- Due to the COVID-19 pandemic, production volumes in 2020 were substantially lower. Production fully recovered in 2021, and even increased compared to 2019.
- In addition to a post COVID-19 revival in 2021, we also increased production capacity:
 - for example, a French coating company was acquired in 2020. This entity ran its first full production year within the Sioen group in 2021.
 - In some factories, the production capacity was increased by introducing a 5th shift.
- The explanation for the sharp increase in emissions related to electricity consumption for all sites is that compared to 2020, there is a decrease in the share of green electricity consumed. In 2020, 79% of all electricity purchased was originally green. In 2021, this decreased to 13%.

Energy KPI evolution

	2016	2017	2018	2019	2020	2021	2021 vs 2020	2021 vs 2016
kWh/m ² produced	0,96	0,37	0,27	0,22	0,27	0,27	-1%	-72%
kWh/kg produced	1,10	1,02	1,01	1,07	0,89	0,98	10%	-11%
kWh/lm produced	0,71	0,71	0,81	0,82	0,72	0,68	-5%	-5%
kWh/piece produced colouring solutions	0,88	0,92	0,71	0,68	0,38	0,51	36%	-42%
kWh/piece produced	2,18	1,95	1,88	1,56	2,11	2,07	-2%	-5%

Relative

In the table above, the total energy consumption for production (electricity & gas) is expressed in function of production volumes.

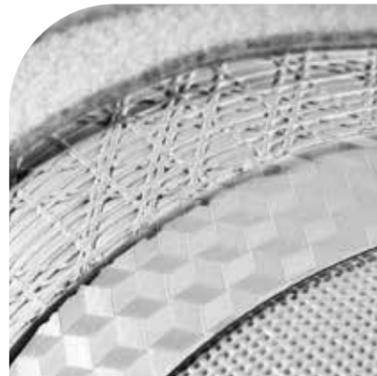

Focus on sustainability resulted in major improvements over the past 5 years.

-5%

The energy consumption per lm produced (in our weaving mills) decreased with 5% in 2021 compared to 2020.

This is due to an increase in production efficiency. There's a decrease of 5% compared to 2016, the year we started disclosing our energy KPI.

-72%

The energy consumption per m² produced (mainly coating division - coated technical textiles) decreased with 72 % in the past 5 years.

On the one hand, this is due to continuous efforts to improve energy efficiency in the production processes of our technical textiles. On the other hand, the main driver of this reduction is an increased production of laid scrim, which uses less energy per square metre.

-42%

The energy consumption per piece produced in the Chemicals division decreased with 42% compared to 5 years ago.

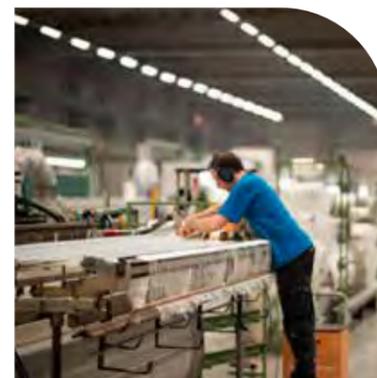

The 36% increase in 2021 is due to a shift in product mix at the plants that produce colouring solutions for DIY. In 2020, in the mids of COVID-19 lock down, the request for small quantity colouring blisters was high, hence the very low energy need per piece produced.

-11%

The energy consumption per kg produced (Coating division – yarns & fibres and Chemicals division - colouring solutions) decreased with 11% in the past 5 years.

The increase of the last year (2021 compared to 2020) of 10% is mainly due to a shift in product mix to lighter products with similar energy needs. On the other hand, the brand new extrusion plant for fibres was fully operational in 2021 and is a major energy consumer.

-5%

The energy consumption per garment piece produced has decreased by 5% in 2021 compared to 5 years ago and by 2% compared to last year. This was entirely due to higher production efficiency.

When we express the direct emissions in function of KPIs (FTE, production volumes):

 **-35%**

The mobility emission per employee decreased with 35% compared to 5 years ago.

In 2021, due to the COVID-19 pandemic, a lot of work had to be done from home. The decrease of mobility emissions per employee in 2020 can mainly be attributed to that. In 2021, we realised another decrease of 7%, an effect of the shift to hybrid and electric company cars.

 **-28%**

The carbon footprint of 1 piece of garment has improved with 28% compared to 5 years ago.

Although there's a 25% energy consumption improvement, CO₂ emissions per piece produced (mainly apparel division) rose with 4%.

 **-12%**

 **-76%**

The carbon footprint of 1 m² of coated fabrics, felt and scrims produced within the Sioen group improved with 76% compared to 5 years ago.

There is a slight increase of 10% carbon footprint per m² produced compared to 2020, an effect of the shift from green to grey energy. The absolute CO₂ emissions increased because of increased capacity. This also affected the relative CO₂ emissions slightly. We're very proud of this stunning 76% improvement over the past 5 years.

The carbon footprint per FTE decreased with 12% compared to 5 years ago.

The total CO₂ footprint per FTE has increased in 2021 compared to 2020. The increase is mainly due to the higher share of grey electricity and higher production after a COVID year with many downtimes and retention of workforce in 2020.

 **-29%**

The carbon footprint of 1kg of yarns, fibres and colouring solutions decreased with almost a third compared to 5 years ago.

Although energy consumption only increased slightly by 3%, CO₂ emissions per kg of product produced increased sharply compared to last year. Mainly related to the use of grey electricity compared to last year. The effect of moving from green to grey energy was most significant in the spinning mill, which is a major consumer of electricity.

 **x5**

The overall improvement of use of green energy over the past 5 years is times 5.

The total share of green electricity has decreased with 83% in 2021, thus effecting the carbon footprint substantially. We'll continue to balance green and grey energy in our daily production.

 **-22%**

The carbon footprint of 1 linear meter of woven fabric improved with 22% compared to 5 years ago.

Despite of the 5% energy efficiency improvements, CO₂ emissions per lm produced (some sites of the coating division) increased strongly. This is again mainly related to a switch to grey electricity.

 **-49%**

Improved efficiency lead to a 49% improvement in the carbon footprint of the pieces of colouring solutions produced.

The carbon footprint of DIY colouring solutions deteriorated in 2021 because of the shift to grey energy. Efficiency improvements and energy saving operations resulted in an important decrease of 49% over the past 5 years.

CO₂ KPI evolution

	2016	2017	2018	2019	2020	2021	2021 vs 2020	2021 vs 2016
Total CO ₂ per employee (scope 1 & 2)	11,5	12,8	8,4	9,8	7,2	10,1	41%	-12%
Total share of green electricity (%)	2,1%	3,0%	74,3%	77,0%	78,6%	13,2%	-83%	522%
Total mobility emissions per employee	0,4	0,3	0,3	0,3	0,24	0,23	-7%	-35%
kgCO ₂ e/m ² produced	0,20	0,08	0,05	0,04	0,04	0,05	10%	-76%
kgCO ₂ e/kg produced	0,24	0,23	0,04	0,09	0,06	0,17	197%	-29%
kgCO ₂ e/lm produced	0,15	0,15	0,04	0,04	0,03	0,12	360%	-22%
kgCO ₂ e/piece produced in Chemicals	0,16	0,17	0,11	0,11	0,05	0,08	49%	-49%
kgCO ₂ e/piece produced in apparel	1,42	0,94	0,89	0,74	0,97	1,02	4%	-28%

Calculating our CO₂ footprint annually makes it possible to closely monitor the evolution of our CO₂ emissions and performance. In 2021, an effect of a renewed increase in production after the COVID-19 pandemic and a switch to grey electricity is particularly visible, as a result of which the total CO₂ emissions have increased compared to 2020.

We're particularly proud of our achievements over the past 5 years. We've been able to improve almost all metrics substantially. This was made possible by many people and departments. Those excellent results are the silent witnesses of having ESG included in the overall corporate strategy.

Reducing waste & raw material efficiency - road to circular economy

Having a waste management program in place is of major importance. This includes characterisation, minimisation, collection, treatment, recycling, reuse, and disposal. It also implies having a waste policy and deploying through education programs.

To go circular, first go vertical – waste reduction is key

We are set on reducing waste within the entire value chain, starting with the ones we own. As a **vertically integrated company**, our impact is bigger because we can detect waste from yarn to finished product. There is a saying: “to go circular, first go vertical.” Vertical integration helps us to **close the loop** on our products because we have **better control** over their lifecycle.

Beyond Reduce, Reuse, Recycle

We are set on applying circular practices that go beyond the traditional 3 Rs (Reduce, Reuse, Recycle) and even beyond the newer 5 (Refuse, Reduce, Reuse, Repurpose, Recycle) and lower environmental impacts. We have added a 6th: **Rethink**. Our campaign: “design for” - Design for Resource Efficiency, Repair, Long Service, Reuse, Disassembly and Recycling – is ground-breaking.

Education

We are set on **awareness-based** waste education inside our own company and beyond. We have launched a program to reduce the amount of waste produced and disposed in our plants. The overall goal of the program is to raise awareness of waste management and how we can responsibly reduce waste and eventually work towards zero waste. This program also includes **sensitisation** when it comes to raw materials and energy use.

Today's products are tomorrow's raw materials

We are set on **reclaiming raw materials from waste** and are actively looking for recycling solutions in all our production processes and for our end products. Sioen has a growing range of biodegradable textiles: from compostable woven tea bags to weed-resistant geo cloths to degradable films for body bags. We partner up to provide our customers with fully circular protective clothing. (See also p. 86 Business and Innovation)

csr.sioen.com
QR code: Read more about waste related actions on our CSR website link

Our waste* in 2021

- 189 tons wood
- 1.358 tons paper
- 993 tons PMD
- 150 tons metal
- 2.638 tons water
- 169 tons PE foil
- 1.265 tons hazardous

In 2021, our waste amounted to **12.488 tons** of which 68% is either being recycled or reused by ourselves or by third party specialists. The other 32% is collected by waste disposal companies.

*Excluding German, USA & Apparel plants. Measures are taken to include these plants.

Selected Actions

5% lighter geotextiles with identical properties

Our improvements allowed us to develop a 5% lighter product with the same properties by:

- Installing a new production line
- Continuously improving the production process

Recycling PVC (polyvinyl chloride) and solvents

We recycle the PVC waste and the solvent we use to clean the tubs at our direct coating plants.

Reclaiming raw materials from waste

Harvesting alternative raw materials from our industrial streams that otherwise would have been discarded as waste.

Recycled yarns and fibres

On our state-of-the-art Sioen yarn and fibre extrusion lines, we apply a no-waste policy and recycle PES en PP waste into new yarns. When our high Sioen quality standards aren't met, the polyester and polypropylene are upgraded and recycled.

Towards Paperless

Pilot project where tablets are used to add the data to the system instead of paper forms.

Circle A

New business model for circular protective clothing in close collaboration with a wholesaler, a professional cleaner, a recycling company and the customer.

From vertical integration to circular economy

We're searching for raw materials that are biobased, biodegradable, recycled and recyclable. Continuously optimising our sourcing and production processes.

Water: Zero discharge status.

Biodegradables: Sioen invests in the research and development of biodegradable yarns and fabrics.

Sioen offers clothing based on recycled or biobased materials, but we also works on (partial or complete) high value recycling of our garments to close the loop. Our efforts also consist of creating durable garments with a longer lifespan, which contributes indirectly to a sustainable world.

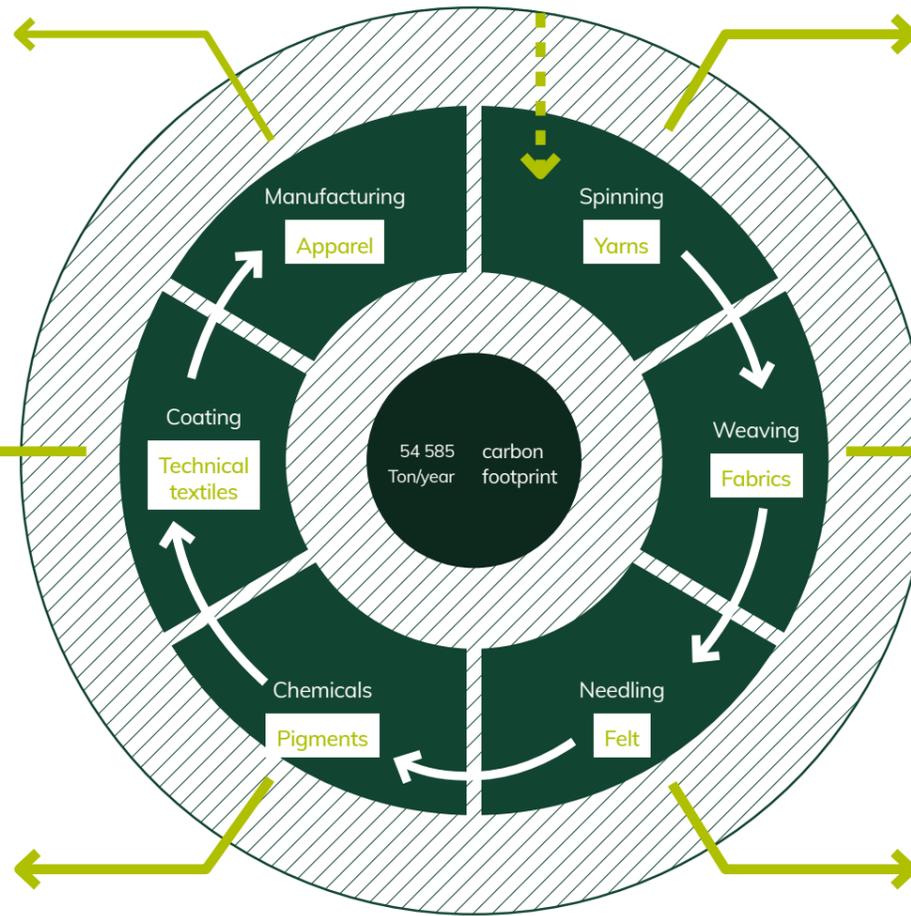

In the Sioen PET and PA recycling units, we recycle all polyester production waste, such as hard lumps and yarns from the spinning mill and edges and fabrics from the weaving mills.

>30 associations
>20 certificates
>10 awards

Sioen is actively collaborating with re-use and recycling of coated technical textiles. Through our membership of the plastic sheet industry association IVK and VinylPlus, we are involved in the VinylPlus: Epcoat system that collects and recovers an increasing quantity of used PVC-coated textiles every year.

Soil consumption is crucial to the growth and development of our society. At Sioen, we want to do our part in reducing the impact of infrastructure works on the territory. Our specialists at our geotextiles production plant have deep knowledge of soil management issues, and risk prevention.

Waste: We strive for zero waste.

Energy recovery: Incinerators on site.

Solar panels: We install solar panels on all our sites.

Windmills: We produce textile parts for windmills.

ESG REPORTING

Pillar 2: Human capital

People make the difference.
They are our greatest asset.

We want to measure and improve the impact we have on our employees, families, customers, suppliers, communities, and any other person influencing or being affected by us. This includes an inclusive HR policy, producing protective clothing and promoting healthy living.

Ambitions

We want to be a second home for all talents. We embrace differences and promote our typical innovation culture. Moreover, we regularly open our doors to young people and students, so that they too can experience an environment in which family values and economical ambitions go hand in hand.

Priorities

1. Employee health and safety - good working conditions
2. Diversity and inclusion - equal opportunities
3. Recruitment, development, retention – personal growth
4. Employee engagement and well-being

SDGs

Employee engagement and well-being

In a world where the war for talent is at an all time high, we are thriving because of our attention for the human behind the person. We are a family-owned business, applying family values. A company where human interaction is valued and peoples' expectations are set to be met.

A workable job

A workable job is one of the pillars of our HR policy. In addition to flexible hours and a flexible remuneration package (aka flex reward, for all Belgian employees), we welcome home office and remote working where possible. We organise, among others, sessions on stress prevention, emphasise the importance of ergonomic work places, stimulate a culture of physical exercise and create green zones within all of our companies.

An eye for well-being, continuous dialogue

At Sioen, we strongly believe that really listening to our people is the first step in having a solid, happy, and loyal workforce. Apart from the fact that our CEO, Michele Sioen, has a gift in human relations – she makes it her business to daily walk around the factories and offices and personally engage with people – we also engage on official levels with our workforce. Sioen HRM has a good relationship with labour unions in creating an environment of harmony. Resulting in profitability as well as in employee welfare. We also conduct research into the well-being of our people through occasional surveys. Recently, as part of “Feel the Passioen,” we conducted satisfaction surveys through third-party interviews.

Flat hierarchy and teamwork

At Sioen, we do not have boss over bosses, with endless hierarchical communication and decision making chains. We thrive with direct communication in a flat hierarchy with only one level of management (Executive committee) between management and staff level. Promising ideas always find their way. We even organise working groups and steercos that consist of multidisciplinary people, for example around digitalisation, employer branding, products such as GreenTecStyle, sustainability and many more. We also have put a NextGen team in place, where young potentials can bow over topics that interest them without interference of senior management.

csr.sioen.com

Selected actions

Quiet zones

We are installing unique quiet zones in and around our production units. We are convinced that offering our people a quiet place contributes to their wellbeing.

Coolbox

A unique employee-initiated communications room on our Veranneman Technical Textiles weaving site.

European Works Council

In addition to the local labour unions, Sioen is also in continuous social dialogue with its European labour union.

B2Bike

We offer our people company bikes with a bicycle leasing system and promote cycling to work, which is good for health and for the planet.

Lunch & Learn

Colleagues and external speakers inspire us by exchanging experiences about healthy nutrition, bicycle maintenance and ergonomics a.o.

Ergonomic tools

To avoid back problems, we opted for ergonomic equipment that puts less strain on the user. Lifting aid to move the bobbins and standing desks are some examples.

Diversity and inclusion

We stimulate diversity, treating everybody as equal. We provide equal access to opportunities and resources for people who might otherwise be excluded or marginalised and to members of minority groups.

Equal opportunities

At Sioen, we believe that everyone should have the same opportunities. We stimulate diversity, treating everybody as equal, regardless of their skin colour, religion, their gender, age, ... These equal opportunities are applied, for example, in the search for new Sioen talents (employees).

In addition, we go beyond the search for our own Sioen talents. We look for suppliers that offer the same equal opportunities to their workforce. We aim to provide work opportunities to all people equally. For creating sample cards, for example, we often appeal to social enterprises (UK), also called sheltered workshops or work centers (US). Those institutions employ individuals who are developmentally, physically, or mentally impaired.

Women @ Sioen

Sioen is an inclusive company that ensures women's full and effective participation inside the company and that aims to empower all women and to achieve gender equality. Our company is 100% family-owned by female entrepreneurs. The three sisters, Michele, Danielle, and Pascale manage the company with a great vision and strategy. Moreover, over 60% of all our employees are female.

Sioen has a history for inclusiveness. Mme Sioen, one of our founders, has empowered women throughout her entire career. While Mr Sioen developed and produced innovative fabrics, Mme Sioen manufactured professional protective clothing. Mme Sioen, for example, pushed our teams to create professional protective clothing for women and lead by example, just like her husband did. Their 3 daughters follow their footsteps.

† Mme Sioen - Founder Sioen Apparel

QR code: Read more about how we make people's lives better on our CSR website

Selected actions

Owned by women

The three sisters Michèle, Danielle and Pascale Sioen manage the company with a great vision and strategy.

Youth employment

We are encouraging our youth, offering them internships and employing them.

Entrepreneurs for Entrepreneurs helping women

We support this NGO strengthening the skills of female entrepreneurs in Senegal.

PPE for women

We were one of the first companies to offer certified professional protective garments for women. The design and the fit is completely different and adapted to women's physique.

Stimulating diversity

We're treating everybody as equal, regardless of their skin colour, religion, gender, age, ... Every day we welcome dozens of nationalities and people of almost all world religions.

+60% female staff

Women represent more than 60% of our workforce.

People make the difference

Our team of 5 646 passionate people (expressed in this pie below in FTE's) are active in our plants that are located in 20 countries.

Compared to last year, the number of FTE's of the Sioen group increased with 24%. The increase in absolute numbers was the highest in production plants in Indonesia and Tunisia where we manufacture professional protective clothing. Here, in 2020 COVID struck hard. In other plants, the number of FTE's rose to the pre- COVID situation too.

As an industrial production company, the repartition between blue and white collar workers at Sioen is 81/19 %.

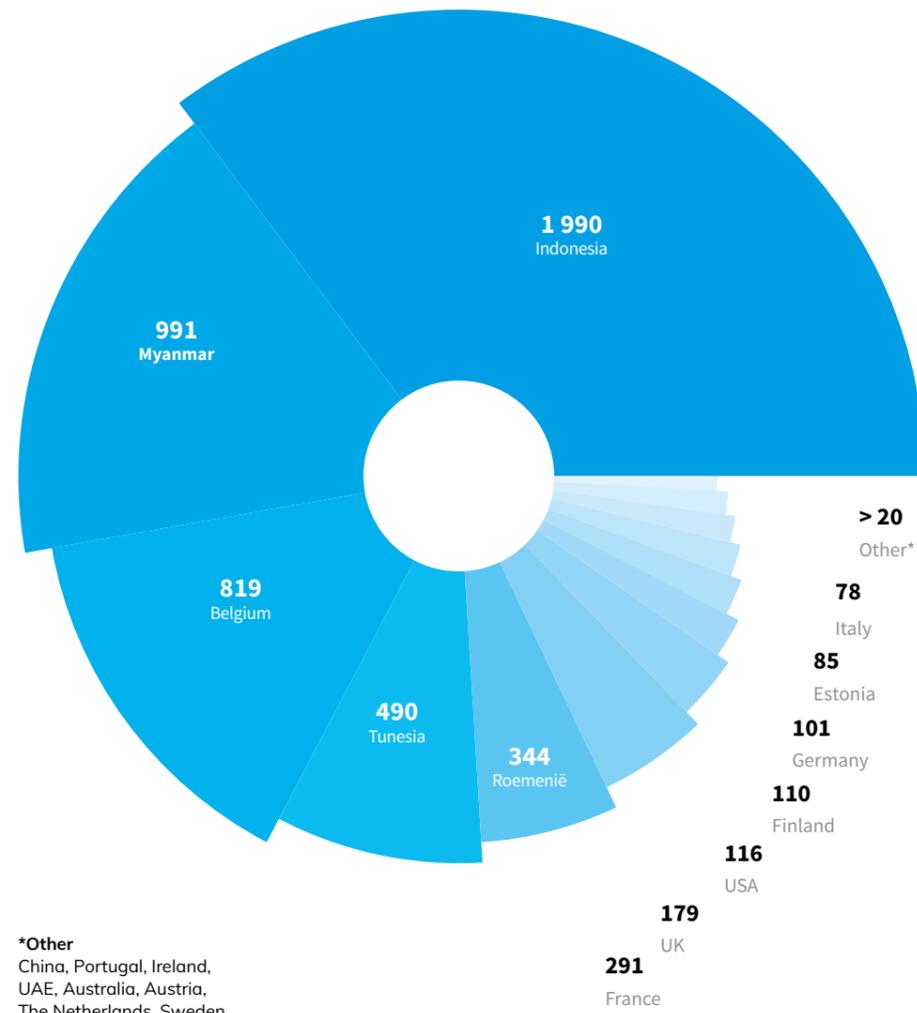

It's our firm ambition to disclose more facts and figures about diversity within our company and are looking into an integrated futureproof HRM system that will allow us to do so.

 **+5 500**

Our People

 **81% blue collars**

 **19% white collars**

Recruitment, development, retention – personal growth

Recruitment and retention are two human resources functions that require strategic thought and planning. In our pursuit of growth, talent management--an area of human resources that includes recruitment and retention--is extremely important. Our most valuable assets are the talent, expertise and resources of our work force. Recruiting and retaining the best talents can only improve the value of that asset.

Feel the Passioen campaign

The power of employer branding does not lie in the campaign but in the overall strategy of the company and of the people endorsing that strategy organically and lifting the company to a higher level.

Personal growth: a learning environment

A learning environment for our own employees and the youth. Lifelong learning is a necessity in a (business) world that is rapidly changing. We also want to help young people and students in the area in their search for knowledge.

Join the Passioen

We let no opportunity go to waste to recruit passionate people. If you feel the vibe and want to be part of our Sioen story, contact us at hrm@sioen.com In Belgium alone, we have ±100 vacancies in all kinds of fields of expertise. jobs.sioen.com

csr.sioen.com
QR code: Read more about education related actions on our CSR website

Selected actions

Lifelong learning

At Sioen, we passionately believe in lifelong learning and we organise and facilitate this in many ways.

Lunch & Learn

During our Lunch & Learn meetings, colleagues and external speakers can inspire us by exchanging experiences.

Talent workshop for vulnerable young people-TAJO

We sponsor inclusive quality education, the best start towards good employment opportunities for vulnerable young people.

Robot camp

We support a local project during summer holidays, where students can improve in STEM (Science, Technology, Engineering and Mathematics) by building a robot.

Assisting students

We're supporting students the whole year round, offering them help with master theses and projects, and we guide them through internships in one of the many departments of our company.

Part of Vlerick board of directors

Our CEO, Michele Sioen, is part of the Vlerick board of directors. This is a triple-accredited, international business school at the heart of Europe for executive education.

Employee health and safety - good working conditions

We care about our people and aim to provide the best working conditions possible and to protect them in their working environment. We know a thing or two about health and safety, as producing professional protective clothing that comply with the highest norms and standards is one of our core competences.

Working conditions

It is obvious that the working conditions for all our collaborators are up to standard, regardless where they are located. We are continuously investing in the best equipment and buildings, to optimise production and working conditions. This includes wages and remuneration that are superior to the local country averages.

External audits

Getting certified by external organisations gives us direction and helps us making a roadmap, monitoring progress, setting targets, and innovating for improvement. We are proud to say that Sioen's working conditions are valorised in many certificates and audits such as ISO 45001, ISO 26000, ISO 45001, amfori BSCI audits, STeP (Sustainable Textiles Production) and ISO/TR 30406.

Selected actions

Highest score on Amfori BSCI audit

Our production sites in Romania and Semarang (Indonesia), where we produce professional protective garments, scored an A.

Ergonomic tools

We continuously invest in ergonomic lifting equipment and standing desks a.o. that puts less strain on the user, avoiding backpain.

ISO/TR 30406 guidelines

By following the ISO/ TR 30406 guidelines we contribute to realising the Sustainable Development Goals concerning employment and decent work (SDG 8), reduce inequalities (SDG 10) and partnerships (SDG 17).

B2Bike

We offer our people company bikes with a bicycle leasing system. With B2Bike, we promote cycling to work, which is good for our health and for the planet. B2Bike is our partner in Belgium for business bicycles.

Cycling tour

We stimulate our employees to live in a healthy way and we support our Sioen Talents' initiatives, such as the annual Sioen cycling tour and running for charity.

Ardooie Urban run

We sponsor the annual Ardooie (town of our HQ) Urban Run for the charity event "Stand up against Cancer". That day, people are running through our plant.

ESG REPORTING

Pillar 3: Social capital

Community connection, more vital than ever.

We measure and improve our network and relationships, enabling us to function more effectively as a company and as individuals. This results in better customer, market, and community insights, generating useful information, innovative ideas, and future opportunities.

Ambitions

We want to be an active member of society as a whole, of local communities and of business-related associations. We want to have even greater customer, market, and community insights. Bonding, bridging, networking, the ways of social capital are various. We have always been a peoples' company and we want to strengthen that.

Priorities

1. Customer centricity
2. Corporate citizenship
3. Memberships

SDGs

Customer centricity

Our customers are never alone in the driving seat. Our multidisciplinary team of experts is always by their sides. We design and produce technical textiles, protective apparel, and colouring solutions to fit their needs and support them in their choices. Part of our customer-centric approach is to apply our wide-ranging expertise to answer even the unexpressed needs and wishes of customers.

“Applying our wide-ranging expertise to answer even the unexpressed needs and wishes of customers.”

Going the extra mile

With 3 divisions on top of their respective fields, we cater to a wide variety of users: our technical textiles serve big infrastructure constructors as well as local trailer builders, our technical apparel is worn by farmers and firefighters alike, while our colouring solutions can be found in applications from wallpapers to napkins.

For us, customer centricity is a full-time job. For our customers, our versatility offers a definite competitive edge. Our sales team, engineers, product developers and a huge R&D department are ideally placed to handle every request with a multidisciplinary and cross-sectoral approach. We aim to exceed our customers' expectations by combining expertise from different core markets and manufacturing processes.

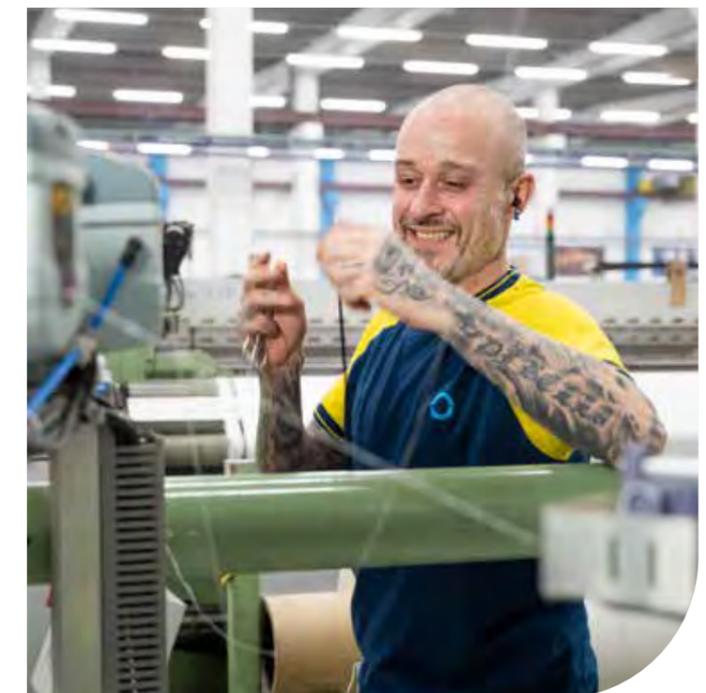

Coating division

Apparel division

Chemical division

(Product) Quality and safety

Quality is not confined to those departments that come into direct contact with the customer. At Sioen, the customer and customer satisfaction take central stage. This calls for an approach in which the quality of the finished products and services provided must meet the customer's highest demands. We therefore do not confine ourselves to just checking the end product but implement an efficient quality policy to ensure appropriate monitoring throughout the entire production and sales process. Our production plants all operate according to the highest quality standards and are ISO 9001 certified.

Constant level of quality

We demand a constant level of quality from all our suppliers and employ the necessary specialists to carry out permanent monitoring on the shop floor and random sample checks. Here, we make use of the latest communication and IT applications.

Advanced in-house engineering

Process engineers are continuously monitoring the production process. The in-house engineering, design, test, and development capabilities at Sioen are enhanced by strategic collaboration with forward-thinking organisations, universities, institutes, and governmental organisations that allow us to access the very latest research resources and expertise.

Technicity is our credo. We are challenged by high technical requirements and pride ourselves on always finding the right product/solution for our customers. We can manufacture products in many ways: in small and large batches, standard or tailor-made, on many machines, 24/7. We are always at our customers' service.

Experience, at your service

Knowledge is one of our great strengths. With over 60 years in the technical textiles business, we have more accumulated knowledge of textile coating technology and coated textile applications than any other company in the world. No other single company masters 8 different textile coating techniques. No other company has as much experience and knowledge of standards and rules in the field of PPE. No other company has experience of as many markets.

Experience Sioen in our showrooms

A lot of customer journeys start in our headquarters in Ardoois (Belgium), where we have two modern showrooms to give visitors a glimpse of what we can do in all 3 divisions. We offer both off-the-shelf products and tailor-made solutions. We control the whole manufacturing chain, meaning that the options are limitless. Every year (well, except in COVID-years), we organise numerous trainings and events in our showrooms. In COVID-Years, we have put a lot of effort into bringing the showroom experience virtually to our customers. Post COVID, both will stay.

Organised for success

We cannot create the future if we are not organised to do so. All our departments contribute to our success, we are only highlighting a few in this report. Thanks to our continuous investments in R&D, digitisation, Artificial Intelligence (AI), smart sourcing of raw materials and a constant focus on sales, marketing and communication, our way of working keeps on improving daily.

R&D

Our major strength is innovation. The Sioen Group currently has more than 220 researchers working in the R&D department. They develop new products and processes. In addition, we have our own in-house testing laboratories where we can efficiently test our products and adapt them to our clients' needs and requirements.

Digitisation

Our digitisation team is involved in a range of projects that help us adapt to an ever-evolving environment. Adapt. Excel. Grow. Some example projects are:

- The CentriCS project includes our CRM and sales supportive platforms.
- EDI, E-invoicing, and E-dunning.
- Digital expense and travel management.
- PIM (Product Information Management) and DAM (Digital Asset Management) systems.
- E-com: Bespoke solutions for clients, tenders, and our distributor network.
- Digital marketing and marketing automation
- Digital workplace: internal communication platforms, Microsoft Teams.

AI – Industry 4.0

Artificial intelligence (AI) can be a great aid in production processes. We use AI to analyse data a.o. Some fabrics produced are scanned in real-time. Those images are then used for quality control. They are building a database with flaws, such as colour degradation or thread thickness, that will avoid mistakes. Our company Veranneman Technical Textiles, set on Industry 4.0, won the prestigious Factory of the Future award.

Sales

Our strong sales teams and back office are our primary power. Our sales teams are organised in groups according to product and geographical region. All sales managers and their colleagues have an extremely thorough knowledge of our products and of the clients' requirements and wishes. They act primarily as technical consultants, guiding our customers to the most optimal product that fits their needs best.

Marketing and communications

We establish customer journeys and personas in order to be able to cater each individual in a personalised way. Obviously, we display our content to our clients through (often personalised) catalogues, sample cards, flyers, POS material, websites and e-shops, social media and many more. We have an optichannel approach and measure and adjust along the way. However, we value personal contact with our clients highly and in non-COVID circumstances we like to meet them personally in our two large showrooms, at our events, on trade fairs and trainings.

Sourcing

Sourcing of raw materials, office supplies, packaging, transport, etc. is significant for any company. We are grateful for the competent skills of our sourcing department. Our suppliers are chosen by considering their cost, supplier reliability, production capability, engagements towards society, corporate values, and the willingness to subscribe to similar ethical, social, and environmental codes as we comply with, among others.

When our customers thrive, we do too

Customer success not only drives retention, but it also drives growth. Offering customers the right textile solution, tailor-made to their requirements is our daily business. We want them to grow, to be successful and to play their role in a sustainable society.

Selected actions

ISO quality

By being ISO 9001 certified, our customers are reassured of quality processes and products. This contributes to achieving the goals set in SDG 12, 16 and 17 of the UN Social Development Goals, among others.

The benefits of spinning

Producing our own yarns gives a competitive edge and helps swift innovation and recycling.

Taskforce circularity

An actionable way of working at Sioen is through dedicated taskforces.

Ursuit, finished to perfection

Craftsmanship ensures that each dry suit is finished to perfection and that the quality speaks for itself.

Factory of the future award - twice

Factory of the Future Award propels us forward. Innovation, digitisation, responsible production and care for our people are focal points.

Global Sourcing strategy

From our suppliers we require: reliability, production capability, engagement towards society, corporate values and the willingness to subscribe to similar ethical, social and environmental codes as we do.

Corporate citizenship

The impact we have on the local, national, and international economy. This includes creating employment, generating innovation, paying taxes, creating wealth, empowering local communities and any other economic impact.

Local roots, part of the community

We work with local entrepreneurs as much as possible: from machine builders and transport companies to printers and painters. In West Flanders alone, we have some 250 companies as partners, good for an annual investment of 15 million euros in the region. But as a group with a global impact, our **scope is unlimited**. In every country we are producing, we are actively engaging in the local community.

 In every country we are producing , we are actively engaging in the local community.

The importance and benefits of cooperation with and between an internationally oriented group like Sioen and local entrepreneurs and SMEs in a globalising world is more than just our money. We provide a lot of employment, which in turn benefits other local businesses such as hairdressers, clothing shops, department stores and so on. We pay taxes and this also benefits the (local) governments and municipalities. And so, the circle is complete: we create wealth.

We pay taxes

Taxes paid amounted to EUR 44.7 million: income taxes (EUR 18.5 million, +49% vs LY), employer social security contributions (EUR 21.6 million, +10% vs LY), holding of fixed assets (EUR 2.6 million), on dividends (EUR 545.4 thousands, on commercial vehicles (EUR 38.6 thousands) and other taxes (EUR 1.4 million).

We grow sustainably

By continuously focusing on cutting-edge technology, new machines, automation, and digitisation, we manage to make better use of the skills of our **employees**. They are given less labour-intensive, repetitive tasks and more possibilities to co-innovate, across the different departments. With thoughtful **acquisitions**, we create added value, so we can proudly say that Sioen is more than the sum of its various parts.

We contribute to society

We contribute directly and indirectly to strengthening the local communities in which we operate. We make donations to charity and cooperate closely with NGOs and other organisations. On our CSR website, you can find plenty of examples of donations and sponsoring big and small, sorted per SDG. We often try to mobilise our Sioen Staff to contribute and even initiate some actions.

Selected actions

Active membership

We're an active member of more than 30 professional associations world-wide.

SOS Faim

By giving Senegalese women access to credit, agricultural equipment, and training, they generate an income through decent work.

Earthquake Croatia & Nepal

We donated much-needed materials after disasters such as earthquakes.

Helping vulnerable young people

We support TAJO, an educational project for vulnerable young people, to achieve its goals.

We support Rising You with climbing gear

Rising You is a Belgian organisation that helps young refugees to find a job by offering them a professional training.

We support a fire investigation dog

We're supporting the training of the fire investigation dog 'Floris' to assist the public prosecutors and the dog support division of the federal police.

Memberships, certificates and awards

We are set on being a member of professional associations that help us integrate social and **environmental compliance** at the heart of our global supply chain. Those memberships offer us **continuous learning opportunities** and the ability to stay up to date on changes within our sector.

We walk the talk and that is reflected in memberships, certificates, and awards. They are the best way to prove to our stakeholders that we do what we say we do. Getting certified by external organisations and being a member of associations that contribute to a sustainable society gives us direction and helps us making a roadmap, monitoring progress, setting sustainability targets, and innovating for improvement in the fields of corporate social responsibility.

Sioen stood at the cradle of many norms and standards

Historically, Sioen has been at the cradle of many safety norms and standards for professional protective clothing and technical textiles. For more than a century, long before things were formalised, we have been producing protective garments and technical textiles.

Norms and standards, translated in certificates are our daily business. It comes as no surprise that in the pursuit of sustainability we are betting on norms and standards and on memberships of associations that can really make the difference.

csr.sioen.com
QR code: Discover our certificates, memberships and awards on our CSR website

Our certificates and audits

Thanks to our certificates and audits, you can have proof of our commitments in sustainability. They provide roadmaps of how we can improve our CSR approach.

The following list is inexhaustive. For an updated overview of our certificates and audits, please consult our dedicated CSR website csr.sioen.com. Even if we do not hold the specific certificate you require, we always make sure we have an alternative one that deals with the same subjects.

This is our why

- Certifications, memberships, and awards can help prove our sustainable practices and offer assurance to you, stakeholders, that we are doing what we say we do. Certifications are not the only way, but they are the most reliable way to prevent greenwashing.
- Certifications also serve as internal roadmaps with guidelines to understand where we are currently at in terms of sustainability and responsibility, and to detect how and where we can improve.
- Memberships inform us, sometimes help us with tooling, provide training and entail formal engagements such as subscribing ethical codes.
- Through memberships and certificates, we also build trust with all our stakeholders and increase stakeholder engagement.

+35
memberships

Our memberships

By being a member of more than 35 different organisations, we are up to date on the newest standards, innovations, etc. Our engagement helps us with tooling, helps us provide training and entail formal engagements.

As we cannot list all organisations we are member of here, you can find the full list on our dedicated CSR website csr.sioen.com.

+10
awards

Our awards

The awards we have won throughout our company history show our dedication, commitment, and innovative spirit. The following list provides a brief overview of the most recent ones. However, as this list is always changing, please also have a look at our dedicated CSR website.

Circletex

Sioen is a proud founding member of Circletex, an association that joins forces to electively collect the released textile flows in Belgium, sort them for local reuse and recycle them into new fibres if possible.

Pillar 4: Business and innovation

Protection through innovation.

In a fast-changing world, companies have two choices: innovating or staying behind. Sioen resolutely opts for the former, which is no secret. Over the years, our sustained innovation culture has become an essential part of our corporate DNA. It is how we distinguish ourselves from the competition and is the reason for being present today in a wide variety of markets with smart textile solutions and efficient powerful production facilities.

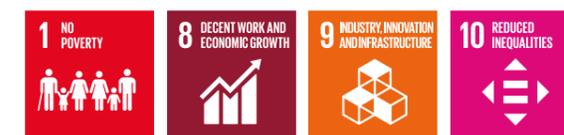

Ambitions

Sioen wants to set the standard and be the number one innovator in the fields of technical textiles and professional protective clothing. We are further investing in product innovation in all aspects of sustainability and enhancing environmental, social, and economic benefits. Our innovative products protect public health and the environment over their whole life cycle, from the extraction of raw materials until their final disposal.

Priorities

1. Intrapreneurship and open innovation
2. Sustainable products

SDG's

Intrapreneurship and open innovation

In lean organisation like ours, we must be smart and act as a team and count on the knowledge, experience, and good intentions of everyone. At our company, successes are shared and celebrated. There's room for entrepreneurship, which implies that there's room for failure too. In addition, we look beyond the company boundaries and work closely together with universities, customers, suppliers, ...

Intrapreneurship

Although our 220-headed R&D team leads our innovation activities, we are convinced that every employee can offer creative added value. Besides, innovation is much more than adapting existing or inventing new products. That is why we encourage all our employees, whether they have a technical or commercial background, to take the initiative themselves.

Have you thought of an innovative HR project, spotted an acquisition opportunity, discovered a promising niche market, worked on an e-commerce strategy or do you have a new idea for automation in mind? Everything is possible. At Sioen, everyone knows the advantages of our flat organisation structure: open doors, direct communication, and quick decisions

Open innovation, looking beyond the company walls

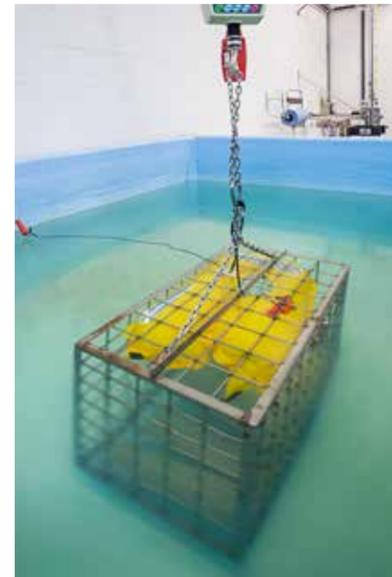

In addition to intrapreneurship, external input is also particularly important for us. For example, we regularly participate in brainstorm sessions with suppliers, customers, knowledge centers and technology experts about opportunities. How can we make optimal use of each other's strengths and how can we cooperate in a future-oriented way? The aim: building a strong ecosystem through innovation.

Good agreements, good friends. That wisdom applies even more to open innovation. When mutual trust is not an obstacle but an asset, then much is possible. For example, we are working with more than 50 partners on **ground-breaking developments** for new and existing markets.

Continuous investment

 **220**
Employees in R&D

 **1,8%**
On turnover per year in R&D

Enhance knowledge sharing

We are enhancing North-South, South-South and triangular regional and international cooperation on science, technology and innovation and **enhance knowledge sharing** between our companies worldwide. Additionally, we are **growing the awareness** of our employees on sustainability and on SDGs, encouraging them to spread the word.

Performant R&D team

Sioen has a concerted focus on knowledge, innovation, and creativity: on new materials, new production processes, new services, new niches, new markets, new business models and any other new requirements.

Our in-house R&D department is the driving force behind the development of new materials, methods, processes, and applications. Their knowledge, state-of-the-art testing equipment and thorough expertise in the field of norms and standards make them highly performant.

Cumulated R&D

In each of the production facilities, we have specialists working in their fields and with thorough proficiency in their own discipline. In this way we have researchers and developers at all levels of our vertical integration with a group of interdisciplinary staff in the Central R&D centre ensuring that all specialists work together to accelerate the development process.

The role of Central R&D is to coordinate the different players where necessary, undertake prototype development where this cannot be done upstream, to serve as a central source of information on safety standards and requirements among others and to test products to these standards. This central prototyping work includes design work on new apparel, which is carried out at Ardoioe, Belgium by a group of experts.

The structure of our R&D department is like a spider's web: centrally managed and fully interconnected, giving unrivalled advantages for our customers.

Sustainable products

Contributing to sustainable consumption and production, starts with producing durable products that have a positive impact on people's lives and businesses. Sustainable products are a win for all.

Producing sustainable products

We are set on producing sustainable products. Here, we consider **the entire environmental** performance of our products through life cycle assessment. From raw material, over design, manufacturing, packaging, distribution, use of the product, until the product is finally discarded and handled to end up as a resource for other product life cycles.

Products reducing our client's carbon emissions

We are set on producing a product range that contribute to reducing our client's carbon emissions. Our textiles for the automobile industry save construction weight and contribute to reducing fuel consumption. Our geotextiles reduce the need for groundworks significantly, cutting back on the CO₂ emissions that a typical construction project emits. Our textiles in architectural applications reduce the heat from the sun that gets into a building, reducing the need for air-conditioning.

Products for renewable energy

We are set on producing and further developing fabrics and garments that enable the production (storage and distribution) of renewable energy from sources such as sunlight, wind, rain, etc. Additionally, we are producing products that reduce heat stress in cities, make our roads and transport better, our cars more ecological and that protect people against viruses, among others.

Products that save lives

We are set on producing products that save lives both in the most literal way of speaking and in a wider scope. Lifesaving garments for the people that protect us, such as firefighters, police, emergency services and people that provide for our food and daily needs such as farmers, fishers, machine operators ... Lifesaving products that reinforce roads, protect against the sun, capture rainwater, hold manure, protect reefs and many more.

Selected actions

Sustainable apparel- designed for sustainability

We design for:
1. resource efficiency, 2. repair, 3. longevity, 4. disassembly, 5. recycling and 6. reuse.

Covid 19 protection

Technical textiles for decontamination units, quarantine curtains, triage tents, mattress protectors, medical intervention clothing, aprons, ...

Greentecstyle®

Greentecstyle® is an innovative textile solution for vertical ecosystems that reduces heat stress in cities.

Circle A- recycling garments

New business model where end of life garments were taken back and recycled to eventually become new garments again.

Biobased and biodegradable fabrics

Sioen puts a lot of effort in developing innovative biobased and biodegradable products.

Eco-designed coated products

Saint-Clair's Evergreen textiles an eco-designed product range:

- With low carbon footprint
- Without emissions of solvents
- With sustainable packaging solutions

Pillar 5: Leadership and governance

Leading by example.
Setting a governance framework.

The common denominator of all thriving companies is leadership. Our CEO, Michele Sioen, “captain of industry » and co-owners Danielle and Pascale Sioen, lead the company to success. They always emphasize that doing so is a team-effort and they surround themselves with capable enthusiasts. In their interactions, both as individuals and as a company, they hold high standards that are formalized in charters and ethical codes.

Ambitions

We want to set the standard in leadership and governance. We set a framework that acts as a system of principles, policies, procedures, responsibilities, and accountabilities. We ensure transparency that keeps the interest of all stakeholders safeguarded.

Priorities

- Governance
- Risk management
- Business ethics
- Purpose
- General information

SDGs

Corporate governance statement

Governance

Sioen is committed to the principles of corporate governance and adopts a policy in line with the interests of all stakeholders both internal and external.

The Board of Directors

Role and mission

The Board of Directors is the highest management body of the company vested with all powers that are not reserved, by law or by the by-laws, to the Shareholders' Meeting. The Board has delegated certain powers to an Executive Committee (a Management Committee as was defined by Belgian law).

As required in the new Code of Companies and Associations the company has opted for the Monistic system. As such the responsibilities of the Board will remain unchanged.

The Board has exclusive responsibility for:

- Preparation and approval of the consolidated periodic financial statements
- Adoption of accounting standards
- Convening Shareholders' Meetings and drawing up the agenda and proposals of resolutions to be submitted to them
- Setting the general strategy of the Group
- Adopting the budget, long term plan and investments
- Appointing the Chairman and the members of the Executive Committee
- Supervision of the Executive Committee
- Major decisions concerning acquisitions and divestures

Besides the regular items, the strategic development of the company is regularly discussed and guidance is provided to the R&D projects. The Board also deals with specific items in terms of concrete issues and current events such as the new "Market abuse regime".

Statutory appointments

Mr. C. Dewulf (permanent representative of CD-X BV) was appointed as new member of the Board of Directors during the General Shareholders' Meeting of 30 April 2021.

Members of the Board of Directors

Chairman

Mr. M. Delbaere: President of the Board of Directors. After his studies in law at the KU Leuven and economics at the UCL, he started his career with Morgan Guaranty Trust Company of New York (J.P. Morgan). In 1978 he founded his company Crop's NV, active in the food industry, and is Managing Director. He holds various other mandates in companies and organizations.

His mandate expires at the 2022 General Shareholders' Meeting.

Managing director

Mrs. M. Sioen (permanent representative of M.J.S. consulting BV): Managing Director. Mrs. M. Sioen holds a master's degree in economics. She started her career at Sioen Industries in 1990. She worked in different divisions of the company and became General Manager of one of the three divisions (Coating division). In 2005, she was appointed CEO of the Group. She is also Director in several other companies and organisations a.o. D'ieren, Sofina and Guberna. She is the honorary president of FEB (Federation of Belgian enterprises).

Her mandate expires at the 2024 General Shareholders' Meeting.

Directors

Mrs. D. Parein-Sioen (permanent representative of D-Lance BV): Non-executive Director.

Mrs. D. Sioen obtained her master's degree in Business Management from ICHEC Brussels Management School. She has an extensive experience in sales and marketing of the fashion- and leisure wear garments-industry and founded her own company MACC JEWEL. She holds various different mandates.

Her mandate expires at the 2024 General Shareholders' Meeting.

Mrs. P. Sioen (permanent representative of P. Company BV): Executive Director.

Mrs. P. Sioen has extensive experience as CEO of the Chemicals segment. She has developed this activity into a full-fledged division of the Group. Mrs. P. Sioen holds also other mandates in private ventures.

Her mandate expires at the 2024 General Shareholders' Meeting.

Mr. J. Noten (permanent representative of Jules Noten Comm. V.): Non-executive independent Director.

Mr. Noten studied at the KU Leuven and Vlekhio Brussels. Later, he followed several courses at the Kellogg Business School (Northwestern University) and Harvard Business School. He established an international career at Unilever for 18 years. Afterwards, as Chairman of Unilever Belgium, he joined Massive. Under his leadership, the lighting company realized a strong internal growth complemented by acquisitions. From 2012 until June 2020, Mr. Noten was CEO of Vandemoortele Group. He holds various other mandates in companies and organizations.

His mandate expires at the 2022 General Shareholders' Meeting.

Mr. P. Macharis: Non-executive independent Director.

Mr. Macharis holds a master's degree in commercial and financial sciences and is an industrial engineer in automation. He is acting CEO of the VPK Packaging Group and holds various other mandates in companies and organizations.

His mandate expires at the 2024 General Shareholders' Meeting.

Mr. D. Meeus (permanent representative of Dirk Meeus BV): Non-executive independent Director.

Mr. Meeus holds a master's degree in law and is acting managing partner of Allen & Overy (Belgium) LLP and Global Co-head of Corporate. He also holds other mandates in various companies.

His mandate expires at the 2024 General Shareholders' Meeting.

Mr. C. Dewulf (permanent representative of CD-X BV): Non-executive independent Director.

Mr. Dewulf holds a master's degree from KUL and a Master of Science (Manufacturing Engineering) and a Sloan Fellowship from M.I.T. (Massachusetts Institute of Technology) in Cambridge, Boston, USA. He has been CEO of the internationally operating LVD Group for 20 years, a leading company in the development and production of high-tech machines, systems and software for the sheet metalworking industry. He also holds a number of mandates in companies and organisations.

His mandate expires at the 2025 General Shareholders' Meeting.

Secretary of the board of directors

Mr. G. Asselman (permanent representative of Asceca Consulting BV): Secretary.

Statutory auditor

Deloitte Bedrijfsrevisoren BV, represented by Mr. K. Dehoorne.

The Board of Directors and how it works

In accordance with the articles of association, the Board of Directors regularly meets depending on the needs and the interests of the company. In 2021, the Board held 7 meetings. The number of meetings attended by Directors individually in 2021 is as follows:

Mr. Michel Delbaere, Chairman.....	7/7
M.J.S. Consulting BV, (represented by Mrs. Michèle Sioen)	7/7
D-Lance BV, (represented by Mrs. Daniëlle Parein-Sioen)	7/7
P. Company BV, (represented by Mrs. Pascale Sioen).....	7/7
Jules Noten Comm. V, (represented by Mr. Jules Noten).....	7/7
Mr. Pierre Macharis	5/7
Dirk Meeus BV, (represented by Mr. Dirk Meeus)	7/7
CD-X BV, (represented by Mr. Carl Dewulf).....	5/7

Working committees

The Sioen Industries Group has the following working committees:

Audit Committee

In 2021 the Audit Committee consisted of three non-executive independent Directors, Jules Noten Comm. V (represented by Mr. J. Noten), Dirk Meeus BV (represented by Mr. D. Meeus) and CD-X BV (represented by Mr. C. Dewulf). The duration of the mandate of members of the Committee coincides with their term as Director.

In 2021 the Audit Committee met 4 times. The external auditor attended 2 meetings. The number of meetings attended by individual members of the Audit Committee in 2021 is as follows:

Jules Noten Comm. V, (represented by Mr. Jules Noten).....	4/4
---	-----

Lemon Comm. V (represented by Mr. J. Noten) is President of the Audit Committee. Conform with the provisions of the Companies Code Sioen opted for a president with an extensive experience and proficiency in financial matters. Mr. Noten studied at the KU Leuven and Vlekho Brussels. Later, he followed several courses at the Kellogg Business School (Northwestern University) and Harvard Business School. He established an international career at Unilever for 18 years. Afterwards, as Chairman of Unilever Belgium, he joined Massive.

Under his leadership, the lighting company realized a strong internal growth complemented by acquisitions. From 2012 until June 2020, Mr. Noten was CEO of Vandemoortele Group. He holds various other mandates in companies and organizations.

Dirk Meeus BV, (represented by Mr. Dirk Meeus)	4/4
CD-X BV, (represented by Mr. Carl Dewulf).....	3/4

In accordance with article 7:99 § 2 of the Code of Companies and Associations, the company declares that at least one of the members of the Audit Committee complies with the requirements of independence and possesses the necessary expertise in accounting and auditing. The members have a collective expertise in respect of the activities of the company. In 2021, the Audit Committee assisted the Board in discharging its responsibilities for monitoring control in the broadest sense.

This included the following tasks:

- Analysis of the consolidated financial statements of the company, both for annual, half-yearly and quarterly consolidated results
- Analysis of possible impairments
- Evaluation of systems of internal control
- Review of the content of the annual financial report as far as following matters are concerned:
 - Financial information
 - Comments on internal control and risk management
 - Supervision and monitoring of the auditor's independence
 - Renewal process of the mandate of the statutory auditor

Remuneration and Nomination Committee

The Remuneration and Nomination Committee in 2021 was composed of three Directors: Mr. M. Delbaere (chairman and independent Director), Jules Noten Comm. V (represented by Mr. J. Noten, independent Director) and Dirk Meeus BV (represented by Mr. D. Meeus, independent Director).

The Committee advises the Board on the following items:

- The remuneration policy in general and on the remuneration of the members of the Board of Directors and the Executive Committee in particular
- stock option plans. In 2019, the Board of Directors initiated a stock option plan.
- appointment or dismissal of Directors

The Board of Directors presents the above mentioned items, enclosed in the remuneration report, to the General Meeting.

The Committee discussed, amongst others, the functioning of the members of the Management Committee, the principles and parameters of the variable part of the remuneration, performed benchmarks as to the remunerations of the members of the Management Committee and Board of Directors and formulates proposals to the Board of Directors.

Nominations have not been discussed during 2021.

The Committee met twice in 2021. The number of meetings attended by individual members of the Committee and the CEO in 2021 is as follows:

Mr. Michel Delbaere	2/2
Lemon Comm. V, (represented by Mr. Jules Noten).....	2/2
Dirk Meeus BV, (represented by Mr. Dirk Meeus)	2/2
M.J.S. Consulting BV, (represented by Mrs. Michèle Sioen)	2/2

The term as members of the Committee coincides with their term as Director.

Management Committee

The members of the Management Committee (per 31 December 2021):

- M.J.S. Consulting BV, represented by Mrs. Michèle Sioen
- P. Company BV, represented by Mrs. Pascale Sioen
- Asceca Consulting BV, represented by Mr. Geert Asselman
- Devos Trading Company BV, represented by Mr. Michel Devos
- Flexcor NV, represented by Mr. Frank Veranneman
- Almelior BV, represented by Mr. Bart Vervaecke
- GPW Lobbestael BV, represented by Mr. Grisja Lobbestael
- O.V.S. Consulting BV, represented by Mr. Orwig Speltdoorn
- Mr. Uwe Stein
- W.P.J. Verbeke Consulting Comm. V., represented by Mr. Wout Verbeke
- Mr. Robrecht Maesen
- Mr. Brecht Viaene

Secretary: Mr. Robrecht Maesen.

Remuneration report

General principles of the remuneration policy

The company compensates the CEO, the Directors and the executive management fairly.

The level and structure of the remuneration is such that qualified and expert professionals can be attracted, retained and motivated, taking into account the nature and scope of their individual responsibilities.

For non-executive Directors, any form of variable compensation is explicitly excluded.

To align the interests of the CEO and the executive management to those of the company and its shareholders, a portion of the remuneration package is linked to the performance of the company and individual performance.

On the advice of the Remuneration and Nomination Committee the Board approves contracts for the appointment of the CEO and other members of the executive management.

Contracts of the CEO or the executive management signed on or after 1 July 2009 incorporate no specific provisions relating to early termination.

The Remuneration and Nomination Committee monitors the market conformity of the fees. This assessment is based on the practical experience of the members in other companies.

The Remuneration and Nomination Committee wishes, through a stable and long term policy, to contribute to a sustainable business climate. Consequently, the above-stated principles will be sustained on the long term, and in particular, for the next two financial years.

Contractual relationships between the company, including related companies, and its Directors and members of the executive management

All contracts, whether a conflict of interest rule is applicable or not, shall be submitted to the Remuneration and Nomination Committee, that makes a recommendation. A guideline has been incorporated in the Corporate Governance Charter (conflict of interests).

Through the internal control and reporting systems, reporting to the Remuneration and Nomination Committee is done at regular intervals. The Remuneration and Nomination Committee in turn reports to the Board of Directors. If the conflict of interest rule (article 7:96 of the Code of Companies and Associations) plays , this is signaled and the procedure described in law enters into force.

Transactions between the company, including related companies, and its Directors and members of the executive management

The Sioen Corporate Governance Charter contains conduct guidelines with respect to direct and indirect conflicts of interest of members of the Board of Directors and the executive management team that fall outside the scope of article 7:96 of the Code of Companies and Associations. Those members are deemed to be related parties to Sioen Industries and have to report, on an annual basis, their direct or indirect transactions with Sioen Industries or its subsidiaries. The Audit Committee ensures that these transactions occur according to the “arms length” principle.

Determination of the individual remuneration level of the CEO, the non-executive Directors and the executive management

The Board of Directors decides on the remuneration policy for the CEO based on a proposal by the Remuneration and Nomination Committee. The remuneration is a competitive and motivating package consisting of:

- A basic compensation component
- A variable compensation determined by the Group results from the previous year, of up to 35% of the basic compensation. This compensation is paid in cash.
- No compensation is paid for insurances or pensions
- There is currently no provision for a long-term performance related remuneration

On the advice of the Remuneration and Nomination Committee, the Board of Directors approves the remuneration of the executive management, as proposed by the CEO. The remuneration is a competitive and motivating package consisting of:

- A basic compensation component
- A variable compensation determined by the Group results on the one hand and the contribution of the various executives within their respective areas of responsibility on the other hand. This variable compensation is up to 25% of the basic compensation and is paid in cash.
- No compensation is paid for insurances or pensions
- There is currently no provision for a long-term performance related remuneration

The General Shareholders' Meeting determines the remuneration of the members of the Board of Directors. The remuneration of the members of the Board of Directors and the various Committees is split into a base fee and attendance fees, each representing approximately 50% of the total remuneration if all meetings are attended.

Departure fees

The departure fee in case of an early termination of the contract shall not exceed 12 months (basic remuneration).

On the advice of the Remuneration Committee, the General Shareholders' Meeting can approve a higher severance pay. This shall not exceed 18 months (basic remuneration).

There are no specific individual agreements with Directors, the CEO and the executive management with respect to departure fees.

There are no specific recruitment agreements, or agreements on a golden parachute with the executive management.

The principles with respect to determining the amount of the variable part of the remuneration

The variable part of the remuneration will always consist of two or more components.

The first part of the variable compensation will always relate to the results of the Group. This is to strengthen the Group cohesion and to prevent counter-productive internal competition.

The second part of the variable part of the remuneration will cover the individual areas of responsibility of the member.

The variable remuneration of the CEO, CFO and Chief HR Officer will only be dependent on the Group results.

The variable remuneration is based on the following principles:

- Turnover (the achievement of certain annual revenue targets and/or growth rates)
- Profitability (return on sales targets and/or investment projects)
- Debt level (the debt of the company is key. In order to ensure future growth, it must be within certain limits.)
- Personal objectives (depending on the function). These mainly relate to qualitative objectives. (For example initiate the development of a long term strategy.)

Depending on the needs, the CEO can propose to the Remuneration Committee to adjust the significance of some parameters annually.

The personal objectives are set annually through individual interviews and the variable remuneration linked to this is up to 30% of the total variable remuneration.

Contracts signed on or after 1 July 2009 refer specifically to the criteria (as stated in the Belgian Corporate Governance Code) to be taken into account in determining the variable portion of compensation.

Recovery right

There is no provision for recovery right in favor of the company in case variable remuneration was granted on the basis of incorrect financial information.

Evaluation of the remuneration

The remuneration of the CEO and each executive manager is evaluated on an annual basis (by the Remuneration and Nomination Committee) as follows:

- The basic compensation is determined by the job responsibilities.
- The variable compensation is determined by formal and informal objectives determined at the beginning of the year and evaluated at the end of the year. The Remuneration and Nomination Committee advises the Board of Directors on the variable compensation that is agreed by the members of the Committee.

Remuneration of the members of the Board of Directors

In 2021 following remunerations were paid to the members of the Board of Directors and executive management in their capacity as Director (no performance related remunerations are paid to the non-executive Directors):

Name	Represented by	Board of Directors		Audit Committee		Remuneration and Nomination Committee		Total
		Fixed remuneration	Pro rata	Fixed remuneration	Pro rata	Fixed remuneration	Pro rata	
	Mr. M. Delbaere President of the Board	30 000	35 000			1 500	1 500	68 000
M.J.S. Consulting BV	Mrs. M. Sioen Managing Director	15 000	21 000					36 000
D-Lance BV	Mrs. D. Sioen Member	15 000	21 000					36 000
P. Company BV	Mrs. P. Sioen Member	15 000	21 000					36 000
Dirk Meeus BV	Mr. D. Meeus Member	15 000	18 000	5 000	5 000	1 000	1 000	45 000
Jules Noten Comm. V	Mr. J. Noten Member and President of the Audit Committee	15 000	21 000	6 000	6 000	1 000	1 000	50 000
	Mr. P. Macharis Member	15 000	15 000					30 000
CD-X BV	Mr. C. Dewulf Member	15 000	21 000	5 000	5 000			46 000
Total		135 000	173 000	16 000	16 000	3 500	3 500	347 000

The members of the executive management(1), including Directors in their capacity as member of executive management, received in 2021 a fixed remuneration of EUR 4 200 320, a variable remuneration of EUR 464 308 and a compensation for other expenses (mainly car expenses) amounting to EUR 302 020.

(1)The executive management consists of executive Directors and members of the Management Committee.

Share based payments

During 2021, the 2019 stock option plan has been settled. The payment didn't exceed the fair value at the repurchase date.

An expense of EUR 72 thousand was recognized under 'Services and other goods' in the income statement by nature.

Other

There are no retirement benefit plans.

Evaluation of the Board of Directors, Working Committees, Directors and interaction with the executive management

Periodically, and at least every two years, the Board evaluates its overall performance (including the Working Committees). In the Board's view, this is best accomplished by the entire Board under the leadership of the Chairman, with the assistance of the Remuneration and Nomination Committee and of an external specialist when deemed appropriate.

The Chairman is in charge of organizing periodic performance appraisals through an extensive questionnaire that addresses the following items:

- the functioning of the Board or Committee
- the effective preparation and discussion of important items
- the individual contribution of each Director
- the present composition of the Board or Committee against its desired composition

Once a year, the Board also evaluates the interaction with the executive management.

External audit

Within the Sioen Industries, external audits are mainly performed by Deloitte Bedrijfsrevisoren. They include the audit of the statutory annual accounts and consolidated accounts of Sioen Industries and its subsidiaries. To the extent that the audit of a number of subsidiaries are carried out by other auditors, Deloitte Bedrijfsrevisoren makes use of their work in certain instances. During the past financial year the Statutory Auditor and its network received EUR 486 202 from Sioen Industries and its subsidiaries in respect of statutory auditor mandates. In addition, the Statutory Auditor and its network received EUR 37 291 for other assignments outside the mandate. The mandate of Deloitte Bedrijfsrevisoren as Statutory Auditors of Sioen Industries NV expires at the General Shareholders' Meeting of 2023. Deloitte Bedrijfsrevisoren is represented by Mr. K. Dehoorne.

Risk Management

General

The purpose of (Enterprise Risk Management) ERM activities at the Sioen Industries Group is to provide a comprehensive program to proactively manage the portfolio of what leadership collectively believes are the most critical risks to the achievement of the entity's mission and objectives.

ERM promotes an ongoing, risk-aware culture across the company to enable decision makers to perform a risk-reward analysis of choices, and make decisions with an understanding of implications of such actions.

The objectives of ERM include:

- To identify and to assess a broad array of risks that could negatively impact the achievement of strategic goals
- To measure the effectiveness and efficiency of our operations
- To assure reliability of the financial process and reporting process
- To comply with laws and regulations

The enterprise risk management systems in place are inspired by the COSO (Committee of Sponsoring Organizations of the Treadway Commission) framework.

Components of the risk management systems and internal control systems

1. Control environment (internal environment)

The control environment is the basis of the internal control and risk management system. The control environment is defined by a mix of formal and informal rules and corporate culture on which the operation of the business relies.

Integrity and ethics

Within the Group the goal is to create an open corporate culture where communication with and respect for customers, employees and suppliers is key, without any distinction.

All employees are expected to deal with the company assets with the necessary common sense and manage them as a good family man. These informal rules / corporate culture, where appropriate, are sustained by more formal rules such as the Protocol to prevent abuse of inside information and the Corporate Governance Charter.

Competences

The expertise and experience of the independent Directors contribute to effective and proper management of the company. The aim is to attract Directors with different skills and experiences in order to create a momentum that enables the Group to develop further.

Governing Bodies and Corporate Governance

In line with the existing guidelines, the Group has the following administrative and operating Committees:

- A Board of Directors
- An Audit Committee
- A Remuneration and Nomination Committee
- An Executive Management Committee

The Board of Directors decides on the strategy of the Group, key policies and risk appetite. The role of the Board of Directors consists of pursuing the long-term success of the company and ensuring that risks are assessed and managed.

The executive management is responsible for developing systems to identify, assess, manage and monitor the risks.

2. Risk analysis (identifying the main issues that could impact our business)

The main risks relating to the Sioen Industries Group can be divided into four categories:

- **Strategic risk:** Strategic risks can be summarized as the risks in relation to the appropriateness of the business model to deliver long term growth in capital and income and the effective communication and delivery of the business model.
- **Operational risk:** Operational risks are risks arising from inadequate or failed processes, people and systems or from external events.

- **Financial risk:** Financial risks are risks associated with financial markets (interest rate risks, currencies, commodities and liquidity risks).
- **Legal risk:** code of conduct (ethics, fraud, reputational damage,...), legal risks arising from litigations and non-compliance with regulatory environment.

Strategic risks

Strategic risks can be summarized as risks in relation to the appropriateness of the business model to deliver long term growth in capital and income and the effective communication and delivery of the business model.

Risks related to the markets Sioen is active in

Sioen Industries Group is in terms of income, affected by the economic performance of its divisions (Coated textiles, Apparel and Chemicals). The main markets that are served by the Sioen divisions are Transportation, Construction and civil engineering, Industry in general and the Marine market. Sioen is sensitive to any major change in activity levels or market dynamics in these activity sectors.

The Group is continuously looking for new applications, new products and new markets to stay ahead of competitors and to increase production and sales activities. If we fail to be innovative, to introduce new ideas, products, services and processes, this can have a negative impact on the operational and financial results of the Group.

Sioen has identified 5 areas of growing future importance around which our R&D is focused and we feel we can offer sustainable solutions;

- **Climate change:** abrupt changes in climatologic circumstances creating drought or flash floods requiring new materials such as geo-synthetics for infrastructure works.
- **Energy:** evolution to the production of "green" energy and the gradual exit of nuclear energy.
- **Ecological footprint:** development of specific technical textiles to help save energy. Newly developed solar protection textiles will become key in the building industry.
- **Safety:** increasing safety awareness and specialization lead to the development of new highly sophisticated garments and technical textiles.
- **Demography:** the demographic evolution requires new processes to cultivate vegetables and other foodstuffs, and requires building and maintaining of infrastructure and new housing.

Sioen R&D department is actively developing new materials to cope with these challenges. More specifically Sioen R&D department is focusing on biodegradable textiles, structural and non-structural composites and substrates for vertical gardens and the agricultural in-

dustry. In parallel Sioen R&D is developing also solutions to recycle sold items at the end of their lifespan.

Risks relating to expansion

The Sioen Industries Group is committed to a growth strategy that includes growth through acquisitions and organic growth. As a consequence the success of this growth strategy also depends on the successful integration of the acquired companies in its existing operations.

Sioen does not apply a big bang theory. New businesses and people are integrated through a soft process where people are in the integration process involved and motivated to create synergies throughout the Group with respect for the strengths and culture of the individual company.

Operational risks

Operational risks are risks arising from inadequate or failed processes, people and systems or from external events.

HR-related risks

The Sioen Industries Group operates on the edge between textile and chemistry. Most of these activities require highly skilled people with various technical backgrounds. In some cases state organized formal educational programs ceased to exist. Sioen mitigates this lack by organizing in-house training programs.

Sioen HR policy evolves around 4 key parameters;

- Hiring highly skilled and professional people
- Training people (both in house and external)
- Motivating people with professional challenges and a competitive remuneration policy
- Retaining staff with various incentives and initiatives

Information technology risks

The Group heavily depends on its IT backbone (infrastructure, network, operating systems, data security, ERP application,...). Although the systems are managed by an experienced team of specialists, their failure could result in an immediate loss of revenue for the Group.

To mitigate these risks the Group has a contingency plan to safeguard the continuity through a mirror and a backup system off-site.

Risk management on delegation of authority

Not respecting the existing signing authorizations may result in commitments relating to operations not authorized by the company. An authorization matrix has been

developed and integrated in the central ERP system (SAP). Sioen is currently working on the roll out of this ERP system in all Sioen companies. For each and every new Sioen company that is integrated in the central ERP system the authorization matrix is reviewed and adapted where needed. Certain authorizations (such as treasury) are centralized throughout the Group.

Fraud risk management

Collective or individual fraud of employees can lead to financial loss and damage the image of the Group. Sioen tries to mitigate this risk by a segregation of duties (where possible) resulting in the above mentioned authorization matrix, through detailed financial controlling and reporting and last but not least through centralizing sensitive tasks.

Risk of fire and environmental risks

As Sioen operates on the edge between textile and chemistry the manufacturing processes require the use of chemicals. Some of these chemicals are quite sensitive and flammable when applied. In order to mitigate this risk Sioen has state of the art equipment, extractor hoods to evacuate solvents, smoke detectors, sprinklers, halon gas extinguishers, automated fire-doors,... to avoid catastrophic accidents.

The use of the chemicals itself requires also special attention as the risk for pollution is real. Here also, Sioen has the necessary handling procedures in place and the production and storage buildings comply with all regulations and standards for handling and storage of dangerous chemicals.

Financial risks

Financial risks are risks associated with financial markets (interest rate risks, currencies, commodities and liquidity risks)

Risks related to commodities

The coating division is the only division of the Sioen Industries Group with substantial exposure to variations in the price of certain commodities. The key polymers, PVC, PET and plasticizer are derivatives of crude oil and their pricing is a mirror of the evolution of the price of crude oil.

In the coating division (66% of the total Group sales) raw materials account for approximately 50% over sales. Each of these 3 key polymers accounts for 25% of the total raw material cost with the remaining 25% being packaging and various other consumables.

An increase in price of 10% in one of the key polymers would have an effect of 1.3 p.p. on the total material cost (cost of raw materials in this division would evolve from 50% over sales to 51.3% over sales). An increase in 10% of all 3 key raw materials would push the material cost to 53.8% over sales in the coating division.

In order to mitigate this volatility, Sioen has adopted a policy of flexible sales pricing, following roughly this evolution with a delay between 4 to 9 months.

In the apparel division (27% of total Group sales) pricing mechanics are quite different. Summarized we can distinguish between items held in catalogue and customer specific garments. Customer specific garments are considered as projects. Each and every project is specifically costed and sales prices are quoted based on the competitive environment. Garments held in inventory are continuously costed and re-costed whereas sales prices are subject to the competitive environment.

The chemicals division has to a large extent the same cyclicity and sensitivity as the coating division.

Risks related to interest rates, foreign currencies and liquidity

The Group's interest risk is relatively limited. To hedge its interest rate risks and to take advantage of the market interest rates, the Group entered into interest rate derivatives together with the loan agreements in 2016. Together with the loan repayments in January 2022, these interest rate swaps have been unwinded.

Currency risks are limited by offsetting transactions in the same currency ("natural hedging") or by hedging exchange rates through forward contracts or options.

To ensure liquidity and financial flexibility, the Sioen Industries Group has sufficient credit lines available to meet current and future financial needs.

Legal risks

Legal risks are associated with risks arising from litigation, non-compliance with regulatory environment and unlawful conduct (non-ethical behavior, fraud, reputational damage, insider trading, ...)

Non-compliance and regulatory risks

Sioen Industries Group has activities in more than 20 countries worldwide, all having their own specific legal requirements and specificities. In order for the Group to comply with various legislations the centrally organized legal department is occasionally supported by local law firms and audit firms.

Non-ethical behaviour

Sioen Industries Group has various policies in place that are underwritten by key managers and that are regularly challenged by the Audit Committee and external auditors.

Reputational damage

Sioen is active in the Apparel or protective garments business. Traditionally the garment industry is situated in low labor cost regions sometimes facing social challenges. Sioen Industries has implemented policies covering human rights, equal opportunities and non-discrimination and banning of child labor. These commitments are supported through our CSR statement. The Group is following up on the impact of climate change and related matters, but as for now, it did not have an impact on the financial statements (valuation rules).

3. Control activities

In order to properly manage the principal risks identified, the Sioen Industries Group took the following control measures:

Formal rules and systems

- An authorization cascade system/matrix in the computer system
- Grant of approval limits
- Definition of signing authorities (authorization contract, payment authority, authority to representation...)
- Access and monitoring systems in the buildings

Physical controls

- Cycle counts of inventories
- Physical inventory of machinery and equipment

4. Information and communication

The consolidated financial statement of Sioen Industries are prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board and endorsed by the European Union. For more detailed information.

The vast majority of the Sioen Industries Group uses the Sioen SAP software and the accounting transactions are recorded in a common operating chart of accounts. An accounting manual prescribes the standard way of recording of the most relevant transactions. The manual is available on the Sioen intranet and is part of the training program of new hires.

The accounting and control organization consists of 3 levels;

The accounting teams in the different legal entities and the shared service center responsible for the preparation and reporting of the financial information.

The controllers at the different levels in the organization responsible for the review of the information.

The Group consolidation and control department responsible for the final review of the financial information provided by the different legal entities and for the preparation of the consolidated financial statements

5. Supervision and monitoring

Currently the nature, limited complexity, size and deeply centralized organization of the company limit the need for an independent internal audit function, contrary to principle 5.2/17 and 5.2/29 of the Corporate Governance Code.

Supervision and monitoring is mainly performed by the Board of Directors via the Audit Committee.

As no formal internal audit department is in place the Board executes this supervision and monitoring through the work of the Audit Committee and the Management Committee. Risks are monitored by a group of "business controllers" who report, monitor and analyze both financial and non-financial KPI's on a monthly basis. All deviations against budgets and against the previous reference period are carefully analyzed and explained. Besides the regular reports and analysis, there is a control matrix. In this matrix all processes of each Group company are analyzed and weak spots in the process are monitored in detail.

The controllers visit on a regular basis the subsidiaries and report to the Group CEO and CFO about their findings. In order to facilitate these reports and controls the Group is rolling out a uniform SAP platform combined with a BI reporting tool. Moreover the Board of Directors also uses the external audit reporting to the Audit Committee on their review of internal controls and risk management systems. Given the recent accelerated growth of the Group and its global presence the Management Committee is contemplating on introducing an independent internal audit function.

Business ethics

In business dealings, Sioen acts as a responsible citizen would do. As a family business, where high values are held in high esteem. This has always been natural and went without saying. In order to raise awareness and to align every party involved with Sioen, we establish formal business ethics, promoting our values and integrity among all our stakeholders. Formalising our business ethics, drives our employee behaviour.

Sioen's Code of Conduct

Sioen applies a formal ethical code of conduct in all its companies and in all its interactions with third parties, in which honesty and integrity are central. We also explicitly ask our suppliers to stick to those values. In addition, we are committed to multiple international agreements.

Our Code of Conduct is a set of internal guidelines, standards and behavioural expectations for our employees to follow and also proves our commitment towards our employees, clients, partners and society as a whole.

Our Code of Conduct provides guidelines on how all Sioen employees worldwide should act. It is mandatory to keep to this Code. It informs our employees of how they are supposed to behave towards colleagues, external partners, clients, among others. It improves the working situation for employees and promotes our business values, as it shows our ethics and compliance with legislation.

Some important personal conduct guidelines:

- No violation of human rights
- No forced labour or child labour
- Treat each other with respect and dignity
- Right to join or refrain from joining a trade union
- No discrimination
- No conflicts of interest
- No harassment, intimidation or violence
- Prevent harm to people and planet

Having a code of conduct helps new employees to get acquainted with our behavioural expectations. It improves the working situation for employees and promotes our business values, as it shows our ethics and compliance with legislation.

Mission, vision, values, strategy

The common denominator of all thriving companies is leadership. Our CEO, Michele Sioen, "captain of industry" leads the company to success. She always emphasises that this is a team effort and she surrounds herself with capable enthusiasts. Her sisters and co-owners Danielle and Pascale, wholeheartedly support her vision of sustainable growth. We strongly believe in leadership by example.

Slogan

Protection through innovation

Mission statement

Sioen is the world market leader in technical textiles and technical apparel, protecting people and their belongings.

Vision

To shape the future of technical textiles.

Values

At Sioen we are:
 Passionate, Integer and ethical, World citizens,
 Respectful for people and environment, Accountable,
 Entrepreneurial and innovative, Creating value.

Strategy

Our strategy consists of:

1. Customer Centricity

Offering customers the right textile solution, tailor-made to his requirements.

2. Vertical Integration

Offering us major control over all manufacturing processes and sustainability.

3. Innovation

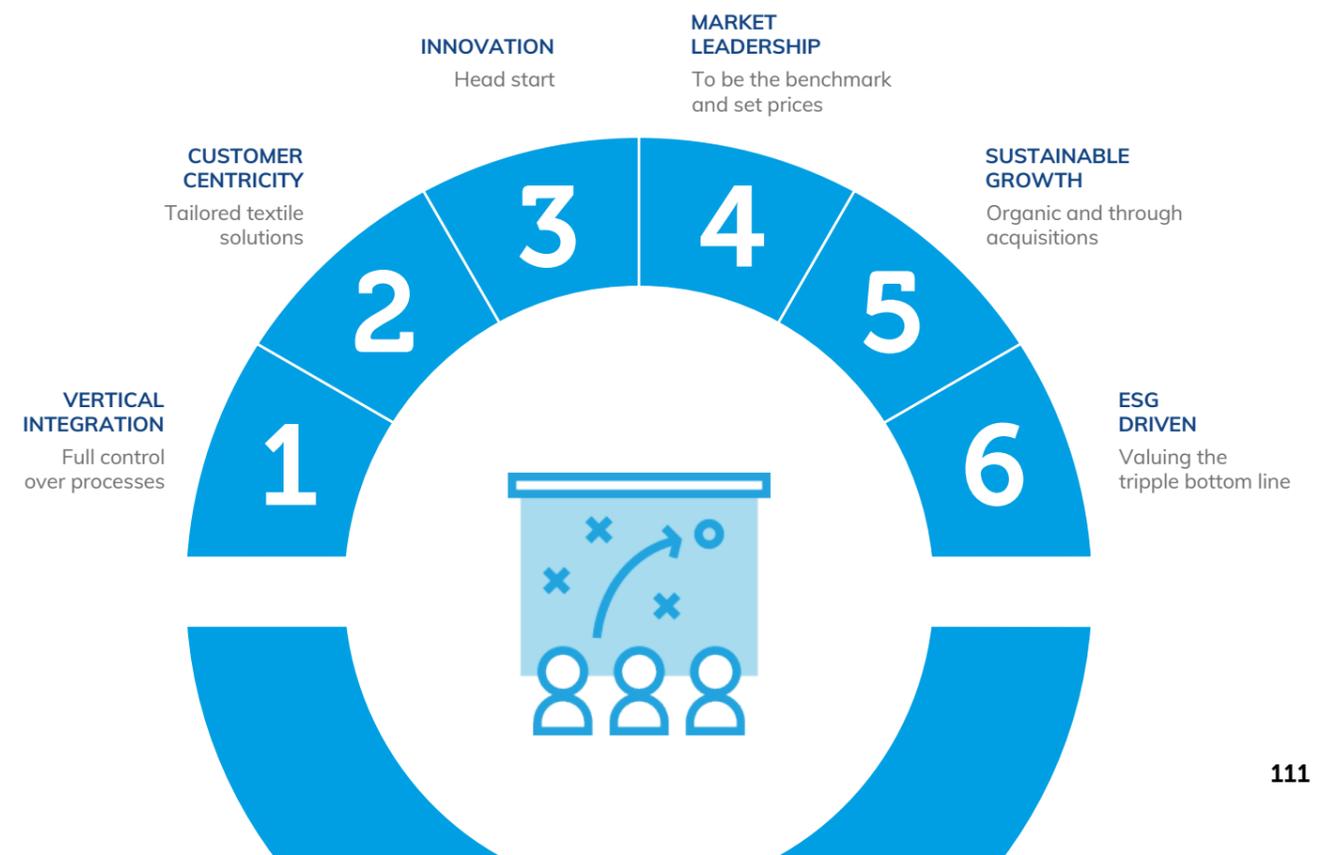

Resulting in new manufacturing processes & digitalisation, in new materials, in new sustainable products and new markets.

4. Market Leadership

Setting benchmarks in markets with high technical standards.

5. Sustainable Growth

Both organically and through acquisitions.

Third party ethical codes

Sioen wants to actively contribute to a better world and to reach out to other companies, professional associations, certifying bodies, auditors, governances, ... in order to align actions and intentions. As we all have an ethical entrepreneurship: 'to put an end to the exploitation of children', 'to fight corruption in a sustainable manner' and 'to develop effective, responsible and transparent institutions', among others.

In section "Memberships, certificates and awards" on page 86 you'll find all memberships, audits, and certificates.

UN Global Compact, a pact on ten principles

Sioen signed the 10 principles of the UN global compact. By incorporating the Ten Principles of the UN Global Compact into our strategy, policies and procedures and by establishing a corporate culture of integrity and values, we're upholding our basic responsibilities towards people and the planet.

- | | |
|---|--|
| <ol style="list-style-type: none"> 1. Businesses should support and respect the protection of internationally proclaimed human rights; and 2. make sure that they are not complicit in human rights abuses. 3. Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining; 4. the elimination of all forms of forced and compulsory labour; 5. the effective abolition of child labour; and | <ol style="list-style-type: none"> 6. the elimination of discrimination in respect of employment and occupation. 7. Businesses should support a precautionary approach to environmental challenges; 8. undertake initiatives to promote greater environmental responsibility; and 9. encourage the development and diffusion of environmentally friendly technologies. 10. Businesses should work against corruption in all its forms, including extortion and bribery. |

The law and beyond

At Sioen, we strive to go beyond the minimal legal requirements, both when it comes to our production process and our people.

Protected ethics advice and reporting mechanism

It is important to have mechanisms in place that are safe and free from retaliation, where people can report a concern, or ask a question. This can be done at one of the confidants or at the Ethics Officer. They are trained to listen, to help and to support employees to address or report issues encountered. We promptly act upon any concern about unethical or unlawful behaviour and lack of organisational integrity.

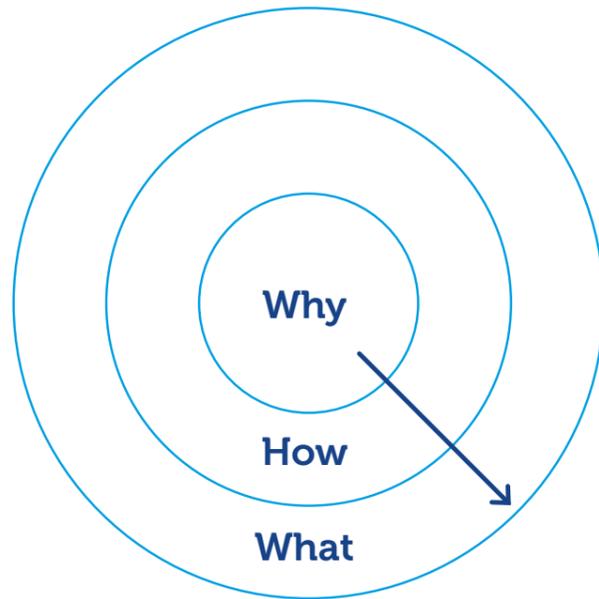

At Sioen, we're also seeking advice about ethical and lawful behaviour and organisational integrity through memberships of professional organisations, among others.

Purpose

Our company proposes solutions to economic, environmental and social issues and creates values for all stakeholders. In the Section "Vision, Mission, Values and Strategy", you can read our overall purpose. Below, you'll find our areas of expertise, why we matter and how we excel.

Why we matter

Protection is key. Even on a regular day, protective materials and garments are everywhere. Think of rain protective garments while riding your bike, roof reinforcement of the truck you're passing by, geotextiles in the road, etc. Sioen's protective solutions are everywhere. Our corporate slogan 'Protection through innovation' says it all. Our mission is to protect people and their belongings with high quality technical textiles and professional protective clothing.

Our purpose - Why

To protect people, property and planet.

Our process - How

By tailored engineering and innovation, our products perform better, endure more and last longer.

Our products - What

We produce high performance yarns, fibres, fabrics, garments and colouring solutions.

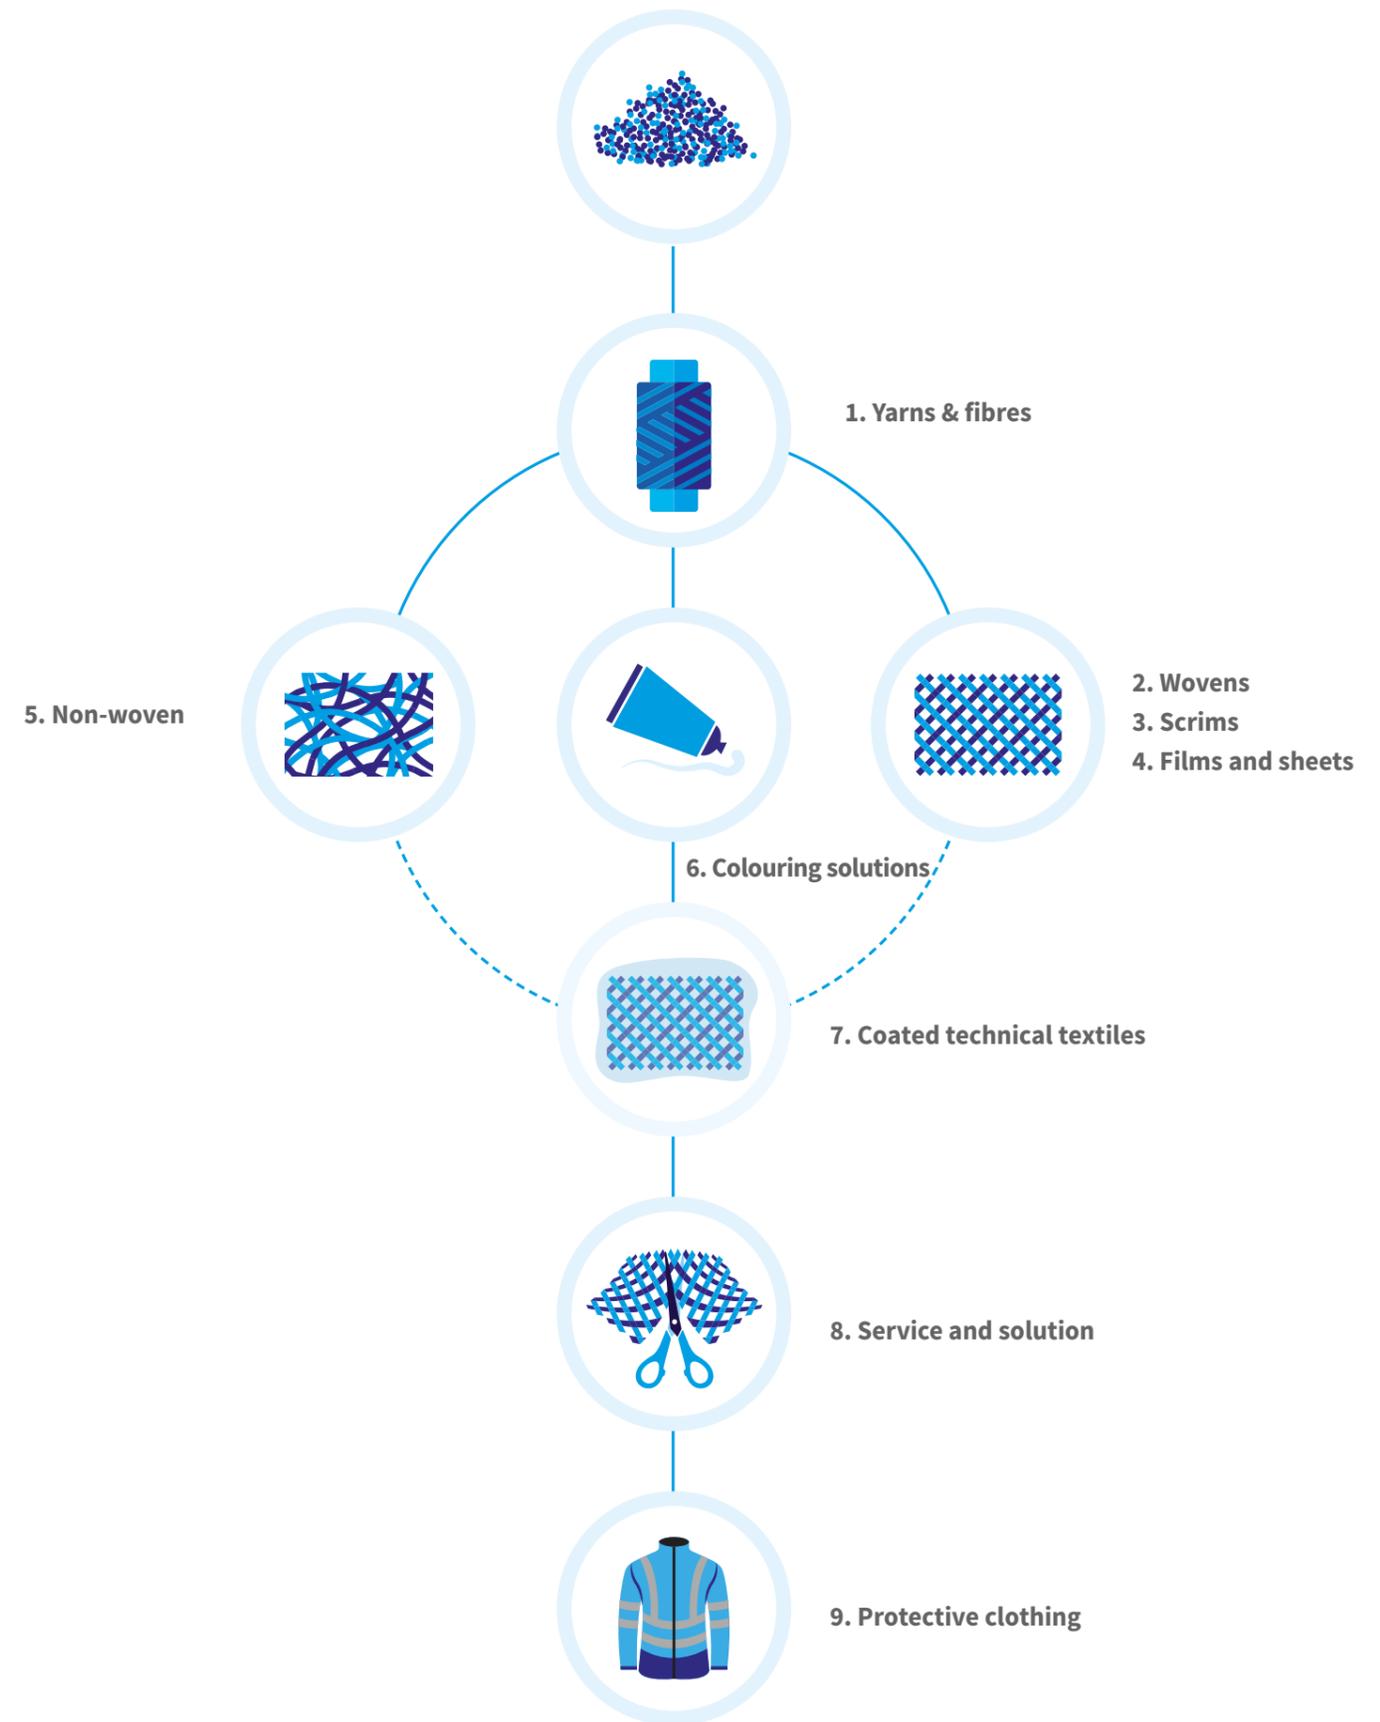

Our areas of expertise

The Sioen Group is **vertically integrated** and the products can be divided into 9 major product groups:

1. Yarns & fibres (Geotextiles, robes and hoses, offshore mooring, conveyor belts and coated textiles)
2. Wovens (Automotive, sailcloth, filtration, food and industrial applications)
3. Scrim (construction, flooring, foil insulation, automotive, fencing, wind shields and birds nets)
4. Films and sheets (Automotive sector, mattress covers, body bags, butchers aprons and packaging foil for liquid refills)
5. Non-wovens (Thermoformable felt, automotive, filtration, and geotextiles)
6. Pigments (Colouring solutions for foam, epoxy, furniture, flooring, wallpaper, inks and DIY)
7. Coated technical textiles (in transport, agriculture, bio-energy, construction, tents and protective clothing)
8. Service and solutions (GreenTecStyle® living walls, pondliners, and Siosteel)
9. Protective clothing (Sioen PPC, SIP Protection, Sioen Firefighter Clothing, Mullion, Ursuit, VanOchten, Sioen Ballistics, Baleno)

“All departments are mutual customers and suppliers. In addition, they sell their products as independent business units to external customers. This mix is at the heart of our success.”

Our corporate slogan 'Protection through innovation' says it all. Our mission is to protect people and their belongings with high quality technical textiles and professional protective clothing.

Reporting (financial) year

The financial year begins on 1 January and ends on 31 December of each year.

Term

The company is established for an indefinite period.

Object of the company

The company's objects consist of the following activities, to be performed in Belgium or abroad, on its own behalf or on behalf of third parties, for its own account or for the account of third parties:

- spinning yarns and threads of all kinds, weaving threads of all kinds, coating and printing fabric and any other material, manufacturing plastic and plastic-coated materials, manufacturing, purchasing and selling, both in Belgium and abroad, materials that are useful for or relate to the above mentioned products and raw materials, and producing chemicals and pigments,
- manufacturing ready-to-wear outer clothing made of woven fabric, manufacturing all types of tailor made garments and embroidery, manufacturing outer clothing made of knitted fabrics, as well as household linen and upholstery materials, manufacturing wall-covering materials, printing and finishing all fabrics, manufacturing ready-made articles and outfits for men and women, knitwear, embroidery, household and table linen, children's clothing. Manufacturing safety and signposting materials. Wholesale and retail trade in all of the above products,
- investing in, subscribing for, taking over, issuing, buying, selling and trading in shares, share certificates, bonds, depositary receipts, claims, funds and other securities issued by Belgian or foreign companies, either or not being commercial companies, administrative offices, institutions or associations and either or not (semi-) governed by public law,
- managing investments and participating interests in subsidiaries, holding managerial positions, providing advice, management and other services to or in line with the activities performed by the company itself. These services can be provided pursuant to a contractual appointment or an appointment in accordance with the provisions of the articles of association, as well as in the capacity of external advisor or body of the client.

The company can realize these objects provided that it meets the legal requirements.

The company can perform, both in Belgium and abroad, all industrial, commercial, financial, movable and immovable activities which may either directly or indirectly extend or promote its business. It can acquire all movable and immovable goods, even if they are not related to the company's objects, neither directly nor indirectly.

The company can in any manner whatsoever acquire interests in all associations, businesses, undertakings or companies that have the same, similar or related objects or that may promote the company's business or facilitate the sale of its products or services; the company can cooperate or merge with such associations, businesses, undertakings or companies.

Consultation of documents
